College Rankings How To Returns:

Orienting the Student in College, with Special Reference to Freshman Week Jay Carroll Knodel, 1930 *Handbook of the Economics of Education*, 2023-01-18 The Handbook of the Economics of Education describes the research frontier in key topical areas and sets the agenda for further work. Modern analysis in the economics of education has made tremendous strides in understanding fundamental issues related to the production of human capital and the impact of varying institutional features of education systems. By bringing together some of the world's leading scholars, this volume provides a unique view of scholarship in the area. The international perspectives of the editors Hanushek at Stanford, Machin at LSE and Woessmann at Munich, lead to a volume with something for all researchers. Topics range from the economics of early childhood education to inequality in society to cash transfers in developing countries. Identification and evaluation of the state of the art. Clear descriptions of the meaning of existing research and the most likely avenues for the future. Insights into how policy interventions in education can help or hurt human capital outcomes.

Special bulletin of the Bureau of

Business Research, College of Commerce and Administration, the Ohio State University, 1928 Return Migration

Decisions Ruth Achenbach, 2016-10-21 Ruth Achenbach develops a model of individual return migration decision making which examines both the process and the decisive factors in return migration decision making of Chinese highly skilled workers and students in Japan. She proposes to answer a question yet insufficiently explained by migration research: why do migrants deviate from their migration intentions and return sooner or later than planned or not at all? Her study integrates factors from the spheres of career, family and lifestyle and redefines stages in long term decision making processes thereby contributing to decision and migration theory. She analyzes migrants shifting priorities over the course of migration including a perspective on life course and on the impact of the triple catastrophe of March 11, 2011.
