Graef, Stefan Hilger, Peter Kloeden, Christos Schinas, 2020-10-21 This edited volume gathers selected peer reviewed contributions presented at the fourth International Conference on Differential Markov models time scales non linear difference equations multi scale modeling and myriad applications **Number Theory and Applications** S.D. Adhikari, B. Ramakrishnan, 2009-06-15 This collection of articles contains the proceedings of the two international conferences on Number Theory and Cryptography held at the Harish Chandra Research Institute In recent years the interest in number theory has increased due to its applications in areas like error correcting codes and cryptography These proceedings contain papers in various areas of number theory such as combinatorial algebraic analytic and transcendental aspects arithmetic algebraic geometry as well as graph theory and cryptography While some papers do contain new results several of the papers are expository articles that mention open questions which will be useful to young researchers **Study SA**, 2006 *Geometry, Algebra and Applications: From Mechanics to Cryptography* Marco Castrillón López, Luis Hernández Encinas, Pedro Martínez Gadea, Ma Eugenia Rosado María, 2016-06-30 This volume collects contributions written by different experts in honor of Prof Jaime Mu oz Masqu It covers a wide variety of research topics from differential geometry to algebra but particularly focuses on the geometric formulation of variational calculus geometric mechanics and field theories symmetries and conservation laws of differential equations and pseudo Riemannian geometry of homogeneous spaces It also discusses algebraic applications to cryptography and number theory It offers state of the art contributions in the context of current research trends The final result is a challenging panoramic view of connecting problems that initially appear distant **Analytic D-Modules and Applications** Jan-Erik Björk, 1993-01-31 This is the first monograph to be published on analytic D modules and it offers a complete and systematic treatment of the foundations together with a thorough discussion of such modern topics as the Riemann Hilbert correspondence Bernstein Sata polynomials and a large variety of results concerning microdifferential analysis Analytic D module theory studies holomorphic differential systems on complex manifolds It brings new insight and methods into many areas such as infinite dimensional representations of Lie groups asymptotic expansions of hypergeometric functions intersection cohomology on Kahler manifolds and the calculus of residues in several complex variables The book contains seven chapters and has an extensive appendix which is devoted to the most important tools which are used in D module theory This includes an account of sheaf theory in the context of derived categories a detailed study of filtered non commutative rings and homological algebra and the basic material in symplectic geometry and stratifications on complex analytic sets For graduate students and researchers **Lectures on Kähler Geometry** Andrei Moroianu, 2007-03-29 K hler geometry is a beautiful and intriguing area of mathematics of substantial research interest to both mathematicians and physicists This self contained graduate text provides a concise and accessible introduction to the topic The book begins with

a review of basic differential geometry before moving on to a description of complex manifolds and holomorphic vector bundles Kähler manifolds are discussed from the point of view of Riemannian geometry and Hodge and Dolbeault theories are outlined together with a simple proof of the famous Kähler identities The final part of the text studies several aspects of compact Kähler manifolds the Calabi conjecture Weitzenböck techniques Calabi-Yau manifolds and divisors All sections of the book end with a series of exercises and students and researchers working in the fields of algebraic and differential geometry and theoretical physics will find that the book provides them with a sound understanding of this theory
