## **Weight Loss Plan World Series Update:**

**The State of Food Security and Nutrition in the World 2022** Food and Agriculture Organization of the United Nations, International Fund for Agricultural Development, United Nations Children's Fund, World Food Program, World Health Organization, 2022-07-06 This year's report should dispel any lingering doubts that the world is moving backwards in its efforts to end hunger, food insecurity and malnutrition in all its forms. We are now only eight years away from 2030 but the distance to reach many of the SDG 2 targets is growing wider each year. There are indeed efforts to make progress towards SDG 2 yet they are proving insufficient in the face of a more challenging and uncertain context. The intensification of the major drivers behind recent food insecurity and malnutrition trends i.e. conflict, climate extremes and economic shocks combined with the high cost of nutritious foods and growing inequalities will continue to challenge food security and nutrition. This will be the case until agrifood systems are transformed to become more resilient and are delivering lower cost nutritious foods and affordable healthy diets for all sustainably and inclusively.

**The State of Food Security and Nutrition in the World 2023** Food and Agriculture Organization of the United Nations, International Fund for Agricultural Development, United Nations Children's Fund, World Food Programme, World Health Organization, 2023-07-12 This report provides an update on global progress towards the targets of ending hunger SDG Target 2.1 and all forms of malnutrition SDG Target 2.2 and estimates on the number of people who are unable to afford a healthy diet. Since its 2017 edition this report has repeatedly highlighted that the intensification and interaction of conflict, climate extremes and economic slowdowns and downturns combined with highly unaffordable nutritious foods and growing inequality are pushing us off track to meet the SDG 2 targets. However, other important megatrends must also be factored into the analysis to fully understand the challenges and opportunities for meeting the SDG 2 targets. One such megatrend and the focus of this year's report is urbanization. New evidence shows that food purchases in some countries are no longer high only among urban households but also among rural households. Consumption of highly processed foods is also increasing in peri-urban and rural areas of some countries. These changes are affecting people's food security and nutrition in ways that differ depending on where they live across the rural-urban continuum. This timely and relevant theme is aligned with the United Nations General Assembly endorsed New Urban Agenda and the report provides recommendations on the policies, investments and actions needed to address the challenges of agrifood systems transformation under urbanization and to enable opportunities for ensuring access to affordable healthy diets for everyone.

### **The State of Food Security and Nutrition in the World 2025**

Food and Agriculture Organization of the United Nations, IFAD; UNICEF; WFP; WHO, 2025-07-28 While some progress and recovery have been made in recent years the world is still above pre COVID 19 pandemic levels and far from eradicating hunger and food insecurity by 2030 SDG Target 2.1 Similarly despite some progress in the global nutrition targets the world is not on track to achieve SDG Target 2.2 Among other factors persistent food price inflation has slowed this momentum The State of Food Security and Nutrition in the World 2025 highlights how elevated inflation in many countries has undermined purchasing power and especially among low income populations access to healthy diets The report documents how high food price inflation is associated with increases in food insecurity and child malnutrition Vulnerable groups including low income households women and rural communities can be particularly affected by food price inflation risking setbacks in the fight against hunger and malnutrition In response to these challenges and to prevent future price shocks the report examines policy measures adopted by countries and outlines what is necessary going forwards It stresses the importance of coherent implementation of fiscal and monetary policies to stabilize markets promote open and resilient trade and protect vulnerable populations Additionally it calls for better data systems and sustained investment in resilient agrifood systems to build long term food security and nutrition These coordinated actions are vital to reignite progress towards ending hunger and malnutrition by 2030
