Trust Construction Projects Spon Research:

Trust in Construction Projects Anita Cerić, 2015-12-14 The relationship between project managers representing project owners and those on the contractor side is often threatened by communication risk The main communication risk minimization strategy in the construction phase is trust which plays a major role in the success of key working relationships across the construction industry This book investigates this phenomenon and goes on to show that once developed trust outshines all other strategies of communication risk minimization and is essential for project success As part of this investigation communication risk in construction projects is examined in detail with a particular focus on the effects of information asymmetry on working relationships Drawing on many years of empirical research involving project managers working internationally *Trust in Construction Projects* also provides strategies to minimize information asymmetries in order to build trust and ensure the success of construction projects By increasing understanding of trust in construction projects this book adds an important new perspective to the fields of construction management and project management This is essential reading for researchers and students as well as practitioners in these fields Effective Construction Project Delivery Titus Ebenezer Kwofie, Clinton Aigbavboa, Wellington Thwala, 2020-06-10 This book focuses on the development of communication skills in the context of non traditional procurement and construction projects It helps readers to understand the fundamentals of non traditional procurement and highlights the inherent communication challenges that arise as well as how to solve them The book is divided into four parts the first of which provides an introduction to communication discussing the theoretical concepts and contextual nature of communication as well as its benefits The second part goes into more depth discussing communication in the context of construction project delivery and non traditional procurement systems what these two terms actually mean and what effective communication looks like in these contexts Part III offers solutions to the inherent challenges of communication including the use of information and communications technology while the book s fourth and final part explores the future of construction communication Given the scope of its content the book represents a valuable asset for researchers professionals and students in the areas of procurement management and construction management *Funding and Financing Transport Infrastructure* Athena Rouboutsos, Hans Voordijk, Aristeidis Pantelias, 2017-09-07 This book seeks to enhance understanding of the impacts of project setup and its implementation environment on project performance by leveraging information from the study of a rich set of European transport infrastructure project cases It puts forward a system s view of project delivery and aims to serve as a strategic tool for decision makers and practitioners The proposed approach is not limited to specific stakeholder views On the contrary it allows stakeholders to formulate their own strategies based on an holistic set of potential implementation scenarios Furthermore by including cases of projects that have been influenced by the recent financial crisis the book aims to capitalise on experiences and provide guidelines as to the design and implementation of resilient projects delivered both through

traditional as well as Public Private Partnership PPP models Finally the book proposes a new Transport Infrastructure Resilience Indicator and a corresponding project rating system that can be assessed with an eye to the future ultimately aiming to support the successful delivery of transport infrastructure projects for all stakeholders involved *Making Sense of Innovation in the Built Environment* Natalya Sergeeva,2019-01-15 This book offers a new understanding of innovation in the built environment The ways meaning of innovation is constructed has important implications for policymakers project managers academics and students Through a longitudinal research study into innovation in firms and projects the book addresses some key themes challenges and concerns that practitioners face when managing innovation in the built environment It examines the key drivers for innovation in the construction engineering and infrastructure firms and projects In particular the questions of how and why innovation becomes recognised and sustained over time are explored Different theoretical perspectives are considered to explain different aspects of innovation This includes sensemaking organisational and individual identity storytelling and narration The book has practical implications for how organisational activities become labelled as innovation and for what purpose It shares some lived stories of innovation as mobilised by practising managers The connectivity between the formal narratives of innovation at the policy level and the lived narratives of innovation articulated by practitioners is explored Combining the theory with practice this book presents an insightful view on the implications of innovation in the business world today **Trust in Construction Projects** Anita Ceric,2015 Culture in International Construction Wilco Tijhuis,Richard Fellows,2012-06-26 Despite the wide range of technologies involved the construction industry still relies heavily on one old fashioned component the human The clients managers designers investors and a whole host of other stakeholders are all involved in a crucial series of relationships that are just as important to project success as technical know how As construction projects become increasingly international as well as interdisciplinary the risk and cost of disharmonious working grows ever larger The growth of IT and the increased reliance on large mergers and joint ventures have created new problems which require a new set of solutions Recent research has generated profound insights into international differences in business culture This new work presents up to date theory and practical guidance identifying situations in which cultural differences present challenges A focus on critical incidents demonstrated in a range of case studies will help readers to foresee such situations in their own projects and processes and so improve strategic and operational decision making in construction collaborations Detailed examples are taken from the Netherlands Germany Poland Turkey the UAE and China to explore a variety of problems in very different economic and cultural surroundings A range of professionals contractors developers investors architects engineers governments public private clients will find this book highly valuable as will researchers and students *Commercial Management of Projects* David Lowe,Roine Leiringer,2008-04-15 This is the first book to establish a theoretical framework for commercial management It argues that managing the contractual and commercial issues of projects from project inception to completion is vital in linking operations

at the project level and the multiple projects portfolios programmes level to the corporate core of a company. The book focuses on commercial management within the context of project oriented organisations for example aerospace construction IT pharmaceutical and telecommunications in the private and public sectors. By bringing together contributions from leading researchers and practitioners in commercial management it presents the state of the art in commercial management covering both current research and best practice. Commercial Management of Projects defining the discipline covers the external milieu competition culture procurement systems the corporate milieu corporate governance strategy marketing trust outsourcing the projects milieu management of uncertainty conflict management and dispute resolution performance measurement value management and the project milieu project governance contract management bidding purchasing logistics and supply cost value reconciliation. Collectively the chapters constitute a step towards the creation of a body of knowledge and a research agenda for commercial management.

Contractual Procedures in the Construction Industry

Allan Ashworth, Srinath Perera, 2018-03-13 Contractual Procedures in the Construction Industry 7th edition aims to provide students with a comprehensive understanding of the subject and reinforces the changes that are taking place within the construction industry. The book looks at contract law within the context of construction contracts it examines the different procurement routes that have evolved over time and the particular aspects relating to design and construction lean methods of construction and the advantages and disadvantages of PFI PPP and its variants. It covers the development of partnering supply chain management design and build and the way that the clients and professions have adapted to change in the procurement of buildings and engineering projects. This book is an indispensable companion for students taking undergraduate courses in Building and Surveying Quantity Surveying Construction Management and Project Management. It is also suitable for students on HND C courses in Building and Construction Management as well as foundation degree courses in Building and Construction Management. Key features of the new edition include: A revised chapter covering the concept of value for money in line with the greater emphasis on added value throughout the industry today. A new chapter covering developments in information technology applications building information modelling blockchains data analytics smart contracts and others and construction procurement. Deeper coverage of the strategies that need to be considered in respect of contract selection. Improved discussion of sustainability and the increasing importance of resilience in the built environment. Concise descriptions of some of the more important construction case laws.

Why Architects Matter

Flora Samuel, 2018-03-09 Why Architects Matter examines the key role of research led ethical architects in promoting wellbeing sustainability and innovation. It argues that the profession needs to be clear about what it knows and the value of what it knows if it is to work successfully with others. Without this clarity the marginalization of architects from the production of the built environment will continue preventing clients businesses and society from getting the buildings that they need. The book offers a strategy for the development of a twenty first century knowledge led built environment including tools to help

evidence develop and communicate that value to those outside the field Knowing how to demonstrate the impact and value of their work will strengthen practitioners ability to pitch for work and access new funding streams This is particularly important at a time of global economic downturn with ever greater competition for contracts and funds driving down fees and making it imperative to prove value at every level Why Architects Matter straddles the spheres of Practice Management and Law History and Theory Design Housing Sustainability Health Marketing and Advice for Clients bringing them into an accessible whole The book will therefore be of interest to professional architects architecture students and anyone with an interest in our built environment and the role of professionals within it
