Labor Market Tightness in Advanced Economies Mr. Romain A Duval, Romain Duval, Yi Ji, Longji Li, Myrto Oikonomou, Carlo Pizzinelli, Mr. Ippei Shibata, Alessandra Sozzi, Marina M. Tavares, 2022-03-31 Two years after the onset of the COVID 19 pandemic a puzzle has emerged in several advanced economies unfilled job vacancies have increased sharply even though employment has yet to fully recover This note sheds light on three contributing factors namely barriers to returning to work changing worker preferences away from certain types of jobs and sectoral and occupational job mismatch The note also assesses the impact of labor market tightness on wage growth showing that it has been large for low pay jobs but milder overall Bringing disadvantaged groups of workers into the labor force including by controlling the pandemic itself would ease labor market pressures while amplifying the recovery and making it more inclusive

Environmental Sensing James K. Lein, 2011-09-18 Remote sensing has witnessed a renaissance as new sensor systems data collection capabilities and image processing methodologies have expanded the technological capabilities of this science into new and important applications areas Perhaps nowhere has this trend been more evident than in the study of earth environments Within this broad application area remote sensing has proven to be an invaluable asset supporting timely data gathering at a range of synoptic scales facilitating the mapping of complex landscapes and promoting the analysis of environmental process Yet remote sensing s contribution to the study of human environmental interaction is scattered throughout a rich and diverse literature spanning the social and physical sciences which frustrates access to and the sharing of the knowledge gained through these recent advances and inhibits the operational use of these methods and techniques in day to day environmental practice a recognized gap that reduces the effectiveness of environmental management programs The objective of this book is to address this gap and provide the synthesis of method and application that is currently missing in the environmental science re introducing remote sensing as an important decision support technology
