Standards for transactions and code sets are vital to efficient and effective communication among healthcare organizations. The impact should be higher quality at less cost. Privacy relates to power. When one person has another person's private information that other person loses some control. This power perspective sheds light on the intense conflict that surrounds privacy discussions. The Privacy Rule gives the patient strong rights over his or her information. The Security Chapter describes how organizations address the proposed Security Rule. Workflow management is vital to healthcare organizations and when done properly gives security as a derivative. Therefore organizations should see the proposed Security Rule as a challenge to improve their workflow. The reader is assured that the author will watch for any changes in law or regulation. When a significant change occurs such as a Final Rule is issued or withdrawn the author will make available updated information. Audience and Related Work. Anyone working in or around healthcare could benefit by reading this book. The targeted audience is people in healthcare organizations that have some information systems responsibility. More particularly managers in hospitals and information systems consultants have responsibilities that require them to know the content of this book. The book also serves many others such as nurses or radiologists within the provider community, information systems staff within an insurance company and salespeople in consulting firms or lawyers. A company might use the books to help persuade staff about the relevance of HIPAA to a company's information policies and tools. The material assumes no particular background of the audience as regards information systems or healthcare. However maturity is assumed in terms of understanding both healthcare and information systems.
