

Trigonometry

Trigonometry comes from the Greek words *trigon* (triangle) and *metron* (measure). It is the study of triangles. Trigonometry is usually studied as the measurements of sides and angles of triangles and as points on a unit circle. The measures of angles are usually represented by letters from the Greek alphabet such as θ , α , β , and γ .

Right Triangles

Definitions & the Pythagorean Theorem

- Right triangle:** Triangle with exactly one 90° (right) angle.
 - Hypotenuse:** Longest side of a right triangle; always located opposite the right angle.
 - Legs:** The two shorter sides of a right triangle.
- EX: Triangle ABC is a right triangle.
AC and BC are legs, and AB is the hypotenuse.

- The **Pythagorean Theorem** states that the sum of the squares of the legs of a right triangle is equal to the square of the hypotenuse.
- Symbolically, this is represented as $a^2 + b^2 = c^2$, where a and b are the lengths of the legs of a right triangle, and c is the length of the hypotenuse.

EX: Solve for r in right triangle RST.

Solution:
Use the Pythagorean Theorem.
 $r^2 + t^2 = c^2$
 $r^2 + (24)^2 = (26)^2$
 $r^2 = 576 - 676$
 $r^2 = 100$
 $r = 10$ cm

Special Right Triangles

- There are two **special right triangles** with properties that are very useful in problems solving. These triangles occur in enough applications that their side length relationships should be memorized.
- A **30° - 60° - 90° triangle** has a 30° angle, a 60° angle, and a right angle. In a 30° - 60° - 90° triangle, the sides are in the ratio $1 : \sqrt{3} : 2$. In other words, if the shorter

- leg has length x , then the longer leg is $x\sqrt{3}$ units long, and the hypotenuse is 2 units long.
- EX: If $x = 15$ ft, then $b = 15\sqrt{3}$ ft, and $c = 30$ ft.

- A **45° - 45° - 90° triangle** has two 45° angles and a right angle. In a 45° - 45° - 90° triangle, the sides are in the ratio $1 : 1 : \sqrt{2}$. If the legs each have length x , then the hypotenuse is $x\sqrt{2}$ units long.
- EX: If $x = 6.4$ mm, then $t = 6.4$ mm, and $m = 6.4\sqrt{2}$ mm.

Trigonometric Ratios

- Ratio of the length of two sides of a right triangle relative to a given angle. These include the sine, cosine, and tangent ratios.
- In right triangle ABC with acute angles A and B, the ratios are defined as follows:
 - Sine ratio:** Ratio of the opposite leg to the hypotenuse.
 - Cosine ratio:** Ratio of the adjacent leg to the hypotenuse.
 - Tangent ratio:** Ratio of the opposite leg to the adjacent leg.

Trigonometric Ratios

Sine ratio	Cosine ratio	Tangent ratio
$\sin A = \frac{a}{c}$	$\cos A = \frac{b}{c}$	$\tan A = \frac{a}{b}$
$\sin B = \frac{b}{c}$	$\cos B = \frac{a}{c}$	$\tan B = \frac{b}{a}$

EX: Find the sine, cosine, and tangent ratios for the acute angles in right triangle RST.

Right Triangle Trigonometry

$$\begin{aligned}\sin B &= \frac{12}{17} & \sin T &= \frac{6}{17} \\ \cos B &= \frac{6}{17} & \cos T &= \frac{12}{17} \\ \tan B &= \frac{12}{6} & \tan T &= \frac{6}{12}\end{aligned}$$

- The **reciprocal trigonometric ratios** are the cosecant, secant, and tangent ratios.

Reciprocal Trigonometric Ratios

Cosecant (Reciprocal of sine)	$\csc \theta = \frac{1}{\sin \theta} = \frac{\text{hypotenuse}}{\text{opposite}}$
Secant (Reciprocal of cosine)	$\sec \theta = \frac{1}{\cos \theta} = \frac{\text{hypotenuse}}{\text{adjacent}}$
Cotangent (Reciprocal of tangent)	$\cot \theta = \frac{1}{\tan \theta} = \frac{\text{adjacent}}{\text{opposite}}$

Trigonometric Functions

- The trigonometric ratios define **trigonometric functions** of an angle measure, θ . For example, the functions $y = \sin(\theta)$, $y = \cos(\theta)$, $y = \tan(\theta)$, $y = \csc(\theta)$, $y = \sec(\theta)$, and $y = \cot(\theta)$, can be used to describe the particular ratio for a given angle measure. You can use a scientific calculator to

$$\begin{aligned}\sin(50^\circ) &= 0.766 \\ \cos(34.5^\circ) &= 0.707 \\ \tan(23.4^\circ) &= 0.435 \\ \csc(60^\circ) &= 1.155 \\ \sec(75^\circ) &= 3.864 \\ \cot(15^\circ) &= 3.732\end{aligned}$$

- estimate the values of trigonometric functions for a given angle measure.
 - Inverse trigonometric functions** take a given ratio and "undo" the corresponding trigonometric function to determine the angle measure. These functions are denoted by the prefix \arcsin or by an exponent of -1 .
 - EX: The three functions $y = \arcsin x = \sin^{-1} x$, $y = \arccos x = \cos^{-1} x$, and $y = \arctan x = \tan^{-1} x$ represent the inverses of the sine, cosine, and tangent functions, respectively.
- NOTE: The -1 exponent used in the notation $y = \sin^{-1} x$ indicates the inverse sine function, not the reciprocal of the sine function. Thus, $\sin^{-1} x$ is $\arcsin x$. Be careful to recognize the correct notation when solving problems involving inverse trigonometric functions.

Solving for Unknown Sides & Angles

- Trigonometric ratios and inverse trigonometric functions can be used to find unknown side lengths and angle measures in right triangles.
- EX: Find $m\angle A$ and $m\angle C$ in the figure. Round to the nearest tenth of a degree.

Trigonometry Study Guides Book Review: Unveiling the Magic of Language

In a digital era where connections and knowledge reign supreme, the enchanting power of language has are more apparent than ever. Its capability to stir emotions, provoke thought, and instigate transformation is really remarkable. This extraordinary book, aptly titled "**Trigonometry Study Guides**," published by a highly acclaimed author, immerses readers in a captivating exploration of the significance of language and its profound impact on our existence. Throughout this critique, we shall delve into the book is central themes, evaluate its unique writing style, and assess its overall influence on its readership.

Trigonometry Study Guides Introduction

Trigonometry Study Guides Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Trigonometry Study Guides Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Trigonometry Study Guides : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Trigonometry Study Guides : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Trigonometry Study Guides Offers a diverse range of free eBooks across various genres. Trigonometry Study Guides Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Trigonometry Study Guides Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Trigonometry Study Guides, especially related to Trigonometry Study Guides, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Trigonometry Study Guides, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Trigonometry Study Guides books or magazines might include. Look for these in online stores or libraries. Remember that while Trigonometry Study Guides, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Trigonometry Study Guides eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Trigonometry Study Guides full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a

wide range of Trigonometry Study Guides eBooks, including some popular titles.

FAQs About Trigonometry Study Guides Books

How do I know which eBook platform is the best for me? Finding the best eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice. Are free eBooks of good quality? Yes, many reputable platforms offer high-quality free eBooks, including classics and public domain works. However, make sure to verify the source to ensure the eBook credibility. Can I read eBooks without an eReader? Absolutely! Most eBook platforms offer web-based readers or mobile apps that allow you to read eBooks on your computer, tablet, or smartphone. How do I avoid digital eye strain while reading eBooks? To prevent digital eye strain, take regular breaks, adjust the font size and background color, and ensure proper lighting while reading eBooks. What the advantage of interactive eBooks? Interactive eBooks incorporate multimedia elements, quizzes, and activities, enhancing the reader engagement and providing a more immersive learning experience. Trigonometry Study Guides is one of the best book in our library for free trial. We provide copy of Trigonometry Study Guides in digital format, so the resources that you find are reliable. There are also many Ebooks of related with Trigonometry Study Guides. Where to download Trigonometry Study Guides online for free? Are you looking for Trigonometry Study Guides PDF? This is definitely going to save you time and cash in something you should think about.
