*Translation of Thought to Written Text While Composing* Michel Fayol,M. Denis Alamargot, Virginia Berninger, 2012-05-04  
Translation of cognitive representations into written language is one of the most important processes in writing. This volume provides a long awaited updated overview of the field. The contributors discuss each of the commonly used research methods for studying translation, theorize about the nature of the cognitive and language representations and cognitive linguistic transformation mechanisms involved in translation during writing and make the case that translation is a higher order executive function that is fundamental to the writing process. The book also reviews the application of research to practice that is the translation of the research findings in education and the work world for individuals who interact with others using written language to communicate ideas. This volume provides a rich resource for student theorists and empirical researchers in cognitive psychology, linguistics and education and teachers and clinicians who can use the research in their work.
