## Ai Overview Update:

*Introduction to Foundation Models* Pin-Yu Chen, Sijia Liu, 2025-06-12 This book offers an extensive exploration of foundation models guiding readers through the essential concepts and advanced topics that define this rapidly evolving research area. Designed for those seeking to deepen their understanding and contribute to the development of safer and more trustworthy AI technologies, the book is divided into three parts: Part I introduces the core principles of foundation models and generative AI; Part II presents the technical background of neural networks, delves into the learning and generalization of transformers, and finishes with the intricacies of transformers and in-context learning; Part III introduces automated visual prompting techniques, prompting LLMs with privacy memory efficient fine tuning methods, and shows how LLMs can be reprogrammed for time series machine learning tasks. It explores how LLMs can be reused for speech tasks, how synthetic datasets can be used to benchmark foundation models, and elucidates machine unlearning for foundation models. Part III provides a comprehensive evaluation of the trustworthiness of LLMs, introduces jailbreak attacks and defenses for LLMs, presents safety risks when fine tuning LLMs, introduces watermarking techniques for LLMs, presents robust detection of AI generated text, elucidates backdoor risks in diffusion models, and presents red teaming methods for diffusion models.

Mathematical notations are clearly defined and explained throughout, making this book an invaluable resource for both newcomers and seasoned researchers in the field. Energy Conservation Update, 1980 Scripting Intelligence Mark Watson, 2009-09-01

While Web 2.0 was about data, Web 3.0 is about knowledge and information. Scripting Intelligence Web 3.0 Information Gathering and Processing offers the reader Ruby scripts for intelligent information management in a Web 3.0 environment, including information extraction from text using Semantic Web technologies, information gathering, relational database metadata, web scraping, Wikipedia, Firebase, combining information from multiple sources, and strategies for publishing processed information. This book will be a valuable tool for anyone needing to gather, process, and publish web or database information across the modern web environment. Text processing recipes, including speech tagging and automatic summarization, Gathering, visualizing, and publishing information from the Semantic Web, Information gathering from traditional sources such as relational databases and web sites.

Practical examples show you how to create various games and entertainment applications with Canvas as you learn. Gain valuable experience with HTML5 and discover why leading application developers rave about this specification as the future of truly innovative web development. Create and modify 2D drawings, text and bitmap images. Incorporate and manipulate video and add audio. Build a basic framework for creating a variety of games on Canvas. Use bitmaps and tile sheets to develop animated game graphics. Go mobile: port Canvas applications to iPhone with PhoneGap. Explore ways to use Canvas for 3D and multiplayer game applications.

Introduction to Intelligent and Autonomous Control Panos J. Antsaklis, Kevin M. Passino, 1993

The area of intelligent control is a fusion of a number of research areas in engineering, computer science and mathematics which has evolved from conventional control to enhance the existing nonlinear, optimal, adaptive and stochastic control methods. Intelligent control techniques are currently being utilized for closed loop feedback control in space based applications, manufacturing systems, robotic systems, avionic systems among others to improve system performance, reliability and efficiency. Overall the primary objective of intelligent control is to enhance the performance of the system to the extent that it achieves some level of autonomous control.
