**Global Events: Tipping Points** Dr. Philip Gordon, PhD, 2013-02-21 Tipping Points as evidenced in global events are in many ways influenced by media. This just-released ground-breaking book, *GLOBAL EVENTS TIPPING POINTS*, by Dr. Philip Gordon, PhD, details three case studies which were selected on the basis of common Tipping Point Attributes. Each involved media contagiousness and stickiness during their development and each arrived at a dramatic moment in time which could be characterized by the phenomenon of Tipping Points. Recent *GLOBAL EVENTS TIPPING POINTS* Case Studies: The 2008 Presidential Campaign of Barack Obama was chosen to examine a narrower scope and timeframe for the application of the analysis. The International Financial Crisis of 2007-2010 involves a broader data study period to identify trends and more complex issues. And the Climate Change study is included for consideration as the research and analysis revealed critical relationships between media impact and global events. As the issue of Climate Change is still evolving, Dr. Gordon provides a Global Events Tipping Point Theory methodology for analyzing and predicting our planet's most pressing global issue. Dr. Philip Gordon, PhD, was awarded his doctorate with high honors from the Centre d'Etudes Diplomatiques et Stratégiques (CEDS), Paris, France, and graduated with his masters while on a full fellowship from Johns Hopkins University, Baltimore, Maryland. He currently lives in Burgundy, France, with his wife and two sons. Review Comments: The genius of the formulation of *GLOBAL EVENTS TIPPING POINTS* is that it takes explicit account of the role of social media and the internet in facilitating bifurcations and promoting dynamical instability. In effect, we have trimmed a few feet of tail off the kite. As a reader, I was informed and educated as to the factors which conspire to influence stability instability in complex social systems. The book does a good job of making sense of past bifurcations and dynamical instabilities, namely political instability, our perception of global climate change and international economic crises. My compliments on a truly insightful Global Events Tipping Points. Prof. Dr. med. Peter S. Geissler, A.B.B.S.M.S. M.Phil. Ph.D., Yale M.A.M. Eng. M.S. Ph.D., M.S.M.D., M.Phil., Cantab. truly fascinating book that teaches a whole new way of thinking about major events and how the media can influence them. Being a political junkie I was heavily into the media coverage of the 2008 Obama election and the global financial meltdown both via TV and the blogosphere I now find myself looking for the tipping points and stickiness factors as other key events unfold. **The Membership Economy (PB)** Robbie Kellman Baxter, 2015-03-20 The membership business models of Netflix, Weight Watchers and other industry giants revealed and how you can use them to lead your company to the top of the food chain. For decades consumers and businesses have joined clubs bought products and accessed services using a subscription model. But it has only been in recent years that the model has been transformed and perfected through massive changes in technology. The Membership Economy shows how nimble companies that focus on ongoing formal relationships over one time transactions are thriving. By renting, lending or offering access instead of just ownership organizations can leapfrog industry leaders. In terms of strategic business models this is one that allows for breakthrough growth. With great case studies from American Express, LinkedIn, CrossFit, SurveyMonkey and more this book will show you how to radically rethink how your organization can build loyalty, viral growth and recurring revenue. [Using Emerging Technologies to Enhance Student Engagement](#) Reynol Junco, Dianne M. Timm, 2008 Today's college students have never known a time when personal computers did not exist. They attended K-12 schools where most of their classrooms were equipped with computers. Information technology has always been part of their learning process not to mention the impact it has had on the development of their friendships, research and writing skills, shopping and choice of college or university to attend. They expect that institutions of higher education will respond to their inquiries without delay much in the same way that customer service is handled on the Web. Student expectations are driving the creation of live Web chats in house social networking sites, university wiki and shared virtual spaces. Unfortunately higher education faculty and staff in general and student affairs
