Government Digital Alex Benay, 2018-09-15 Governments all over the world are consistently outpaced by digital change and are falling behind Digital government is a better performing government It is better at providing services people and businesses need Receiving benefits accessing health records registering companies applying for licences voting all of this can be done online or through digital self service Digital technology makes government more efficient reduces hassle

and lowers costs But what will it take to make governments digital Good governance will take nothing short of a metamorphosis of the public sector With contributions from industry academic and government experts including Hillary Hartley chief digital officer for Ontario and Salim Ismail founder of Singularity University Government Digital lays down a blueprint for this radical change New York ,2010 The Michigan Journal ,2012 Current Topics ,1930 *United States review* ,1930 *A Survey on Today's Smartphone Usage* Tobias Himmelsbach,2012-05-26 Diploma Thesis from the year 2011 in the subject Computer Science Miscellaneous grade 2 3 Technical University of Berlin Agententechnologien in betrieblichen Anwendungen language English abstract The smartphone market is evolving rapidly irrespective of the well known spread within the business sector In recent years the average users tend to replace their traditional mobile phones PDAs and Palms with smartphones These devices have become a pervasive part of everyday life Dealing with huge amounts of data the mobile device s and application s demand for certain security standards cannot be underestimated In recent studies the individual user s needs in terms of technical features applications etc have not been addressed and analyzed properly To capture the problem in its full extent it is vital to understand the user s expectations Besides the usage patterns have to be described especially against the background of security aspects As mentioned before recent analyzes did not specifically ask what the user expects from a smartphone Hence the main objective of this work is to get a broad picture on how smartphones are used today and what users expect taking into consideration security aspects An international web based online survey was designed and performed to measure and analyze users behaviour when using smartphones with the aim of finding out what they want and expect from a smartphone The main goals were to identify user needs in the context of smartphones to analyze their knowledge and acquisition to security aspects and to get significant data about the user s behaviour The main findings of the survey are that on the one hand most of the users want a smartphone to provide classic mobile phone features such as performing phone calls writing messages or storing contacts On the other hand they want a smartphone to provide mobile internet access navigation features multimedia aspects a comfortable usability and a good lo
