Interior Design Visual Presentation Maureen Mitton, 2018-04-25 A newly updated and comprehensive guide to all aspects of visual design From doing a quick sketch to producing a fully rendered model the ability to create visual representations of designs is a critical skill for every designer *Interior Design Visual Presentation Fifth Edition* offers thorough coverage of interior design communication used throughout the design process complete with a broad range of real world examples This fully updated handbook presents a full range of styles and techniques used for interior design visual communication from hand drawing to 3D computer modeling Its accessible how to approach guides you through a variety of methods for executing creative and successful design graphics models and presentations Recognizing the ongoing proliferation of digital tools for

visual representation this edition provides the latest information on software used in presentation such as Photoshop and SketchUp and covers the integration of Revit and AutoCAD generated content into design presentations Covers all aspects of visual design and presentation for interior designers Includes color illustrations that feature a wide range of project types including residential healthcare and public projects designed to highlight step by step instructions Provides a discussion of incorporation of 3D digital models into presentations including use in virtual reality and expanded information on scale models including a discussion of 3D printing Includes a companion website for instructors featuring PowerPoint lecture slides and an instructor s manual From traditional to cutting edge techniques Interior Design Visual Presentation Fifth Edition gives students and professionals alike the tools to give life to their design vision Green Intelligent Transportation Systems Wuhong Wang,Klaus Bengler,Xiaobei Jiang,2017-07-10 These proceedings collect selected papers from the 7th International Conference on Green Intelligent Transportation System and Safety held in Nanjing on July 1 4 2016 The selected works which include state of the art studies are intended to promote the development of green mobility and intelligent transportation technology to achieve interconnectivity resource sharing flexibility and higher efficiency They offer valuable insights for researchers and engineers in the fields of Transportation Technology and Traffic Engineering Automotive and Mechanical Engineering Industrial and System Engineering and Electrical Engineering Energy Efficiency in Buildings José Manuel Andújar,Sergio Gómez Melgar,2020-04-28 Buildings are one of the main causes of the emission of greenhouse gases in the world Europe alone is responsible for more than 30% of emissions or about 900 million tons of CO2 per year Heating and air conditioning are the main cause of greenhouse gas emissions in buildings Most buildings currently in use were built with poor energy efficiency criteria or depending on the country and the date of construction none at all Therefore regardless of whether construction regulations are becoming stricter the real challenge nowadays is the energy rehabilitation of existing buildings It is currently a priority to reduce or ideally eliminate the waste of energy in buildings and at the same time supply the necessary energy through renewable sources The first can be achieved by improving the architectural design construction methods and materials used as well as the efficiency of the facilities and systems the second can be achieved through the integration of renewable energy wind solar geothermal etc in buildings In any case regardless of whether the energy used is renewable or not the efficiency must always be taken into account The most profitable and clean energy is that which is not consumed Intelligence, Creativity and Fantasy Mário S. Ming Kong,Maria do Rosário Monteiro,Maria João Pereira Neto,2019-09-30 The texts presented in Proportion Harmonies and Identities PHI INTELLIGENCE CREATIVITY AND FANTASY were compiled with the intent to establish a multidisciplinary platform for the presentation interaction and dissemination of research The aim is also to foster the awareness and discussion on the topics of Harmony and Proportion with a focus on different visions relevant to Architecture Arts and Humanities Design Engineering Social and Natural Sciences and their importance and benefits for the sense of both individual and community identity The

Gaspar,2017-09-01 With SketchUp Pro 2014 you can classify objects according to the standard IFC and export your model to other software in that format This puts SketchUp definitely into the BIM world Another important novelty of 2014 was the introduction of automatic texts in SketchUp LayOut a resource that can be used to streamline the production of labels stamps and even act like Revit s notable tags This little book is just about this new features Trimble introduced the 2013 and 2014 versions within a very small time interval an unusual strategy in the software industry and our SketchUp Pro 2013 Step by

Step book had just been released We hope you enjoy this book and the new features of SketchUp Pro [SketchUp 4.0 for Windows](#) ,2004 SketchUp is software designed to accommodate your personal design process Too often it is your process that must accommodate software Start with massing and loose proportions and then add detail as you go Or if you need to draw more accurately SketchUp can accept exact dimensions or exchange precision data with industry standard CAD systems at any time Unlike CAD you can approach design problems at the level of abstraction that is appropriate to your design goals even as they change throughout a project page 8

SketchUp and LayOut for Architecture Matt Donley,Nick Sonder,2016-06-06 The problem with traditional 2D CAD is that you sometimes lose touch with the overall design because you are forced to think from the perspective of flat construction documents The restrictions of the documentation requirements and the technical limitations of the software take priority over the design itself Designing in 3D gives you the freedom to visualize how the project will look in real life The design becomes the primary focus and the construction documents become a by product of the design That is the way it should be There are plenty of 3D design programs out there that automate much of the process of designing a building but you sacrifice the design once again because you are forced to learn and abide by complicated technical processes in order to get the software to do what you want Creating anything custom further complicates the process or is simply not possible Where SketchUp shines is in its ability to create accurate 3D models quickly in an easy to use interface without forcing users to learn complicated tools or workflows SketchUp has a unique way of prioritizing the design and LayOut provides the conduit to communicate your design on paper In SketchUp LayOut for Architecture you ll learn a step by step workflow that will enable you to eliminate CAD from your workflow focus on your design and produce beautiful construction documents for each phase of design including Schematic Design Design Development and Construction Documentation
