**The Rise of Generative AI. Applications, Challenges, and Ethical Implications** Fatlind Mazreku,2025-12-10 Scientific Study from the year 2025 in the subject Computer Sciences Artificial Intelligence language English abstract Generative Artificial Intelligence AI refers to algorithms and models capable of producing new content such as text images music or code that mimics or even rivals human creations Recent breakthroughs in model architectures e.g. transformers and the advent of large scale models like OpenAI's GPT 3 and DALL-E have fueled an explosive growth in generative AI's capabilities and public adoption This paper provides an overview of generative AI's rise and its transformative impact across various fields We discuss key applications of generative AI in domains ranging from art and design to software development and medicine highlighting the innovative benefits it brings such as enhanced creative productivity and new problem solving tools At the same time we examine the challenges and ethical concerns emerging from generative AI's widespread use issues of bias misinformation intellectual property and misuse that have become increasingly urgent We also analyze the current technical limitations of generative AI including accuracy interpretability and resource demands and consider future outlooks for the technology The findings underscore that while generative AI offers unprecedented opportunities and innovations careful consideration of its ethical implications and proactive governance is essential to ensure it is developed and used responsibly In conclusion generative AI stands as a powerful tool that is reshaping creativity industry and society and its continued evolution will depend on balancing its benefits with diligent management of its risks

*Distributed Computing and Artificial Intelligence, Special Sessions I, 22nd International Conference* Rashid Mehmood,Laura Grande,Anne-Cecile Caron,Pawel Sitek,Roussanka Loukanova,Hoon Ko,Marta Plaza,Lorenzo Scatena,Michela Ricca,2026-01-01 This book serves as a forum to present applications of innovative techniques for studying

and solving complex problems in artificial intelligence and computing. This book brings together experience current work and promising future trends related to distributed computing artificial intelligence and their applications to provide efficient solutions to real world problems. Given the conference's success this book features fifteen special sessions covering a wide range of topics related to AI and other areas of interest. The accepted papers from these sessions are presented in two volumes showcasing the diverse and innovative research being conducted in these domains. This is the first volume which includes the sessions AIMP'M Special Session on AI driven methods for Multimodal Networks and Processes Modeling CLIRAI Special Session on Computational Linguistics Information Reasoning and AI DHC4VS Special Session on International Conference on Digital Heritage Contents for Virtual Space GILL Special Session on and for female technopreneurs and early career researchers in distributed computing and AI organized by the Gendered Innovation Living Labs INNO4CFIS Special Session on Revolutionizing Carbon Farming by Nature Based Business Models and Emerging Innovations in the field of artificial intelligence satellite and green technologies and TECTONIC Special Session on New perspectives and solutions in Cultural Heritage. The DCAI 25 technical program has selected 82 papers in special sessions and as in previous books there are special issues in ranked journals. This symposium is organized by the SMAC Team of the CRISTAL Lab of the University of Lille. We would like to thank all the contributing authors and the members of the Program Committee for their hard and highly valuable work.

*Making Art With Generative AI Tools* Shalin Hai-Jew, 2024-04

In the dynamic realm of generative artificial intelligence, AI is the fusion of human creativity and machine intelligence, creating a vibrant ecosystem of collaborative artmaking. However, this transformative process brings forth a myriad of concerns ranging from ethical considerations and the need for originality to navigating the legal complexities surrounding intellectual property. As more and more online communities appear around the use of AI to aid in the creation of images, there arises a pressing need for a comprehensive guide that not only dissects the intricacies of artmaking with generative AI tools but also offers practical solutions to the evolving dilemmas faced by artists, researchers, and technologists. *Making Art With Generative AI Tools* emerges as an exploration of the challenges posed by this intersection of human expression and artificial intelligence. Artists engaging with generative AI find themselves grappling with issues of authenticity, social toxicity, and the commercial viability of their creations. From avoiding stereotypical visuals to ensuring proper crediting, the realm of generative AI is rife with these complexities. Furthermore, the blurred lines between human and machine authorship necessitate a deeper exploration of how these innovative tools impact creativity, representation, and the very fabric of the art world.
