Evidence based courses in mind body wellness typically explore how physical and emotional wellbeing are related to biological, psychological, sociocultural, economic and spiritual factors as well as the ways in which our beliefs about the relationship of mind and body relate to how we view health and illness. Subsequent chapters address foundational topics in the field including theories of behavior change, stress and wellness, mind body practices, environmental wellness and relationship wellness. The book ends with consideration of how mind body wellness can not only impact our personal wellbeing but also societal wellbeing. **The**
