College Rankings

Luke Myers, Jonathan Robe, 2009 Today college quality rankings in news magazines and guidebooks are a big business with tangible impacts on the operation of higher education institutions. The college rankings published annually by U.S. News and World Report. U.S. News are so influential that Don Hossler of Indiana University derisively claims that higher education is the victim of management by the magazine.

How did academic quality rankings of colleges and universities become so powerful in higher education? A review of their historical development in the first section of this study may surprise many readers. While college professors and administrators alike largely decry rankings today, their origin lies in academia itself.

Begun as esoteric studies by lone professors, college rankings developed into the most popularly accepted assessment of academic quality. This was fueled by the very institutions of higher education they now judge. While the purpose and design of academic quality rankings has evolved during the century since their creation, their history teaches one clear lesson: college rankings fill a strong consumer demand for information about institutional quality and, as such, are here to stay for the foreseeable future. Various approaches to college rankings have different benefits and each is subject to legitimate criticism, all of which should be seriously considered in light of the powerful effects that a widely distributed ranking can have on institutions of higher education and the students seeking to enter them. Sections II and III will explore these aspects of college rankings respectively. In light of the historical lessons revealed in Section I, however, movements that seek to reform college rankings should be focused on producing better rankings rather than on trying to eliminate or ignore them. Section IV will survey multiple new indicators of academic quality that many view as potential improvements over the indicators upon which current college rankings are based.

Contains 2 figures, 6 tables and 116 endnotes.

Evaluating and Responding to College Guidebooks and Rankings R. Dan Walleri, Marsha K. Moss, 1995-12-27 The proliferation of college guidebooks and reputational rankings has become of increasing concern to many in the higher education community. Public relations and admissions staff view such publications from a marketing perspective and the potential positive or negative consequences for enrollment. College presidents share these concerns along with the broader implications for the overall stature of their institutions. The validity and integrity of the information reported is of particular interest to those who work in the area of

institutional research Acknowledging the fact that the public the consumers has a great need for information about different institutions in order to make informed college choices for themselves or their children all of these groups in higher education share alarm about the burden imposed on institutions in responding to the ever increasing number of publishers requesting information for these guidebooks and rankings This volume explores some of the major facets of and issues surrounding college guidebooks and ratings The background and development of these publications are traced followed by discussion of major issues and perspectives consumer use of the publications validity of ratings and the institutional burden of supplying the needed information View from both the institutions and the publishers are presented This is the 88th issue of the quarterly journal *New Directions for Institutional Research* For more information on the series please see the Journals and Periodicals page **[Handbook on Corruption in Higher Education](#)** Elena Denisova-Schmidt,Philip G.
