Greg Conti,2009 What Does Google Know about You And Who Are They Telling When you use Google s free services you pay big time with personal information about yourself Google is making a fortune on what it knows about you and you may be shocked by just how much Google does know Googling Security is the first book to reveal how Google s vast information stockpiles could be used against you or your business and what you can do to protect yourself Unlike other books on Google hacking this book covers information you disclose when using all of Google s top applications not just what savvy users can retrieve via Google s search results West Point computer science professor Greg Conti reveals the privacy implications of Gmail Google Maps Google Talk Google Groups Google Alerts Google s new mobile applications and more Drawing on his

own advanced security research Conti shows how Google's databases can be used by others with bad intent even if Google succeeds in its pledge of don't be evil. Uncover the trail of informational bread crumbs you leave when you use Google search. How Gmail could be used to track your personal network of friends, family and acquaintances. How Google's map and location tools could disclose the locations of your home, employer, family and friends travel plans and intentions. How the information stockpiles of Google and other online companies may be spilled, lost, taken, shared or subpoenaed and later used for identity theft or even blackmail. How the Google AdSense and DoubleClick advertising services could track you around the Web. How to systematically reduce the personal information you expose or give away. This book is a wake up call and a how to self defense manual, an indispensable resource for everyone from private citizens to security professionals who relies on Google.
