Work, Subjectivity and Learning Stephen Billett, Tara Fenwick, Margaret Somerville, 2007-06-03 In recent year efforts to understand learning for and throughout working life have moved away from a focus on workplace training to concerns about learning as a component and outcome of engaging in work and work related activities and interactions This shift acknowledges a broader set of workplace factors that shape workers learning and development Yet equally it acknowledges that this learning through engagement is also necessarily shaped by the diverse ways that individuals elect to engage or participate in workplace activities Central here is the issue of individuals subjectivity and how this is shaped by but shapes engagement in work and therefore what learning flows from their participation It is in considering the relations among subjectivity learning and work that it is possible to advance both the conceptual and procedural bases for understanding learning through and for working life Moreover the focus on relations among subjectivity work and learning represents a point of convergence for diverse disciplinary traditions and practices that are provided by the book s contributors In this way the contributions represent something of the emerging perspectives that are elaborating the complex relations among subjectivity work and learning and circumstances in which they are played out

Current Practices in Workplace and Organizational Learning Bente Elkjaer,Maja Marie Lotz,Niels Christian Mossfeldt Nickelsen,2022-01-01 The central assumption that guides this book is that research and practice about learning at the workplace has recently lost its critical edge This book explores what has happened to workplace learning and organizational learning and studies what has replaced it In addition the book discusses to what extend there are reasons to revitalize it Today themes such as innovation co creation and knowledge sharing seem to have become preferred and referred to as theoretical fields as well as fields of practice In several chapters of this book it is argued that the critical power of learning could be regained by starting a new discussion of how these new fields of practice can be substantiated by topics such as learning arrangements learning mechanisms and learning strategies Hence the aim of this book is to both advance and recapture our knowledge of learning in today s increasingly complex world of work and organizing The contributions in this work do so by revisiting classic research on workplace and organizational learning and discussing how insights from this body of literature evokes new meaning It sets the stage for new agendas and rethinks current practices that are entangled in activities such as innovation co creation knowledge sharing or other currently widespread fields of practice

The Process of Learning about Static Electricity and the Role of the Computer Simulator Valerie K. Otero, 2001 The concepts investigated in this study stemmed from two things First a pilot study where we found that the static electricity simulator results coupled with the CPU pedagogical structure provided facilitated the articulation and sharing of ideas in a small group of three students From this we hypothesized that the simulator tools played a role in knowledge construction and we wanted to find out more about what role it played Second the past ten years of research in mathematics and science education has led to the recognition of the importance of the instructional setting collaboration and cognitive tools in the construction of knowledge A tradition has emerged where researchers have begun to look at the individual's knowledge construction through a different lens than the knowledge that emerges through group interactions From this type of research

we can learn about the knowledge construction of the individual and the knowledge construction of the group We can understand how the interactions within the group have influenced the knowledge development of the individual However we cannot learn about how the individual influences the group parameters Repeated interactions between individuals and tools can fundamentally change the social and material setting We need to look at how the social and material setting changes as a result of the individuals interaction with it and how this changing social setting influences the conceptual development of the individual Investigating interdependent interaction between the individual and the social and material setting is the foundation for this work I believe that understanding learning requires more than understanding the individual and understanding the social environment of which he was a part Understanding learning means understanding how the individual changes the social and material setting and how these changes influence the individual This dissertation is devoted to understanding individuals learning the factors that influenced it and further understanding how these factors were determined by the knowledge evolution of the individual

Learning In The Workplace Stephen Billett, 2020-07-16 Learning in the workplace has come of age with the publication of this book It shows the way for a new level of sophistication in the ways learning and work are treated And it opens new territory for exploration in the world of learning throughout life David Boud University of Technology Sydney Stephen Billett provides a comprehensive and practical model well grounded in theory and research to guide learning in the workplace This is a must read for those in vocational education and training Victoria Marsick Columbia University Learning does not stop when you leave school or tertiary studies but continues throughout life The workplace is now seen as an important learning environment and businesses and government units are encouraged to become learning organisations This is all very well in theory but how does learning actually occur in the workplace Drawing on research of a wide variety of workplaces in different countries Stephen Billett analyses the strengths and limitations of on the job learning He outlines what knowledge individuals need and how they can best acquire this knowledge in workplace settings He shows how to develop a workplace curriculum and how it can be implemented in organisations of different sizes Learning in the Workplace offers a comprehensive pedagogy for the workplace It is a valuable reference for human resource practitioners and students in courses on professional development and adult and vocational learning

Authentic Professional Learning Ann Webster-Wright, 2010-08-05 There is considerable and growing interest in professionals learning across their working lives The growth in this interest is likely premised upon the increasing percentage of those who are being employed under the designation as professionals or para professional workers in advanced industrial economies Part of being designated in this way is a requirement to be able to work autonomously and in a relatively self regulated manner Of course many other kinds of employment also demand such behaviours However there is particular attention being given to the ongoing development of workers who are seen to make crucial decisions and take actions about health legal and financial matters Part of this

attention derives from expectations within the community that those who are granted relative autonomy and are often paid handsomely should be current and informed in their decision making. Then like all other workers professionals are required to maintain their competence in the face of changing requirements for work. Consequently a volume that seeks to inform how best this ongoing learning can be understood supported and assisted is most timely and welcomed. This volume seeks to elaborate professional learning through a consideration of the concept of authentic professional learning. What is proposed here is that in contrast to programmatic approaches towards professional development the process of continuing professional learning is a personal complex and diverse process that does not lend itself to easy prescription or the realisation of others' intents.

The Catechism Explained Francis Spirago, 1899. This Catechism is divided into three parts. The first part treats of faith the second of morals the third of the means of grace. In the first part Our Lord appears in His character of Teacher in the second in His character of King and in the third in His character of High Priest. And since this Catechism proposes as its primary object to answer the question for what purpose are we here upon earth thereby emphasizing and giving prominence to man's high calling and destiny it is especially suited to the present day when the pursuit of material interests self indulgence and pleasure engrosses the attention of so many. This Catechism is in fact nothing more nor less than an abstract of Our Lord's teaching and may be called a guide book for the Christian on the road to heaven. Preface
