Susan Best,2021-06-17 How does something as potent and evocative as the body become a relatively neutral artistic material From the 1960s much body art and performance conformed to the anti expressive ethos of minimalism and conceptualism whilst still using the compelling human form But how is this strange mismatch of vigour and impersonality able to transform the body into an expressive medium for visual art Focusing on renowned artists such as Lygia Clark Marina Abramovic and Angelica Mesiti Susan Best examines how bodies are configured in late modern and contemporary art She identifies three main ways in which they are used as material and argues that these formulations allow for the exposure of pressing social and psychological issues In skilfully aligning this new typology for body art and performance with critical theory she raises questions pertaining to gender inter subjectivity relation and community that continue to dominate both our artistic and cultural conversation **Immunization Update** ,1996 **Instagram Power: Build Your Brand and Reach More Customers with the Power of Pictures** Jason Miles,2013-10-08 Instagram is the hottest social media site two years after its launch the number of its daily mobile users surpassed that of Twitter This book provides what you need to grab customers on the world s popular photo sharing site **Journal of Communications and Networks** ,2009 **Report** Universitetet i Bergen.

### **Fidelity Analysis for the OH-58D Kiowa**

**Warrior Crew Trainer** John E. Stewart, 1998 The Army must balance cost and training effectiveness in acquiring a Kiowa Warrior Crew Trainer (KWCT). This entails determining the least fidelity required for specific training objectives employing the least costly technology. A fidelity analysis was conducted which involved a) analysis of training requirements, b) review of the literature, and c) empirical assessment of a benchmark KWCT. Subject matter experts (SMEs) identified 13 tasks for which training in the aircraft alone was inadequate. It was concluded that the KWCT should train these tasks under the full range of visibility conditions and when affected by obscurants. The literature revealed virtually no data on display resolution required to train tasks other than target detection and identification. It also implied that a visual display system with adequate field of view (FOV) and resolution for target detection and identification at realistic standoff ranges would be prohibitively expensive. For the benchmark KWCT assessment, small sample size made performance evaluation difficult. Gunnery was more affected by degraded depth cues when resolution was low (480 lines) than when high (768 lines). Low resolution was perceived as inadequate for all tasks and high resolution as marginally adequate for gunnery. FOV was perceived as less critical to gunnery than to general flying.    *Department of Defense Appropriations* United States. Congress. Senate. Committee on Appropriations, 1992
