Artificial Intelligence and Healthcare - A New Frontier Dr. Amrit Pal Singh Brar, 2025-09-05 ARTIFICIAL INTELLIGENCE AND CONTEMPORARY MEDIA Dr. Moon Jana, Dr. Shourini Banerjee, 2025-06-13 Artificial Intelligence plays a pivotal role in transitioning from generic uniform content to personalised experiences tailored for individualistic approach Utilising sophisticated algorithms AI platforms analyse user sentiments behaviours and engagement patterns to curate tailored content news feed videos articles and advertisements This book aims at understanding different viewpoints from authors on Artificial Intelligence technology and the contemporary media scenario **Handbook of Research on Lifestyle Sustainability and Management Solutions Using AI, Big Data Analytics, and Visualization** Iyer, Sailesh Suryanarayan, Jain, Arti, Wang, John, 2021-12-24 The sudden outbreak of the COVID 19 pandemic has curbed human lifestyle by imposing restrictions on regular daily movements that had been taken for granted Due to the pandemic the welfare segment has received more attention and every possible effort is being made to prioritize the services at the top This can be made possible while using the latest tools technologies and resources that impact the human culture and welfare of well being Novel methods and devices that make the welfare services more efficient adaptive transparent and cost effective need to be explored The Handbook of Research on Lifestyle Sustainability and Management Solutions Using AI Big Data Analytics and Visualization offers extensive research on lifestyle management and services that contribute towards indication detection conduction protection and technological enhancement including machine learning deep learning artificial intelligence big data analytics and visualization It also provides mechanisms that can improve lifestyle monitoring and help in increasing the immunity of the human body Covering topics such as big data robot therapy and wearable technology it is ideal for students researchers technologists IT specialists computer engineers systems engineers data scientists doctors hospital administrators engineers academicians and technology providers **Mental Health, Epidemiology and Machine Learning** Marcos Del Pozo Banos, Robert Stewart, Ann John, 2025-01-23 Mental health disorders are underlain by a wide diversity of influencing factors and they exert their impact across multiple domains in a patient s life As such mental health research has greatly benefited from the proliferation of large and diverse databanks with many and new types of data often covering a large sample of or even whole populations However traditional epidemiological and statistical techniques have proven to be insufficient to tackle the complexity of mental illness While such data have spurred important advances in the area of mental health they have also introduced new limitations that risk stalling progress In this context machine learning provides in theory novel opportunities to leverage the potential of databanks and propel population mental health research forward Indeed after a slower introduction compared to other health specialties the popularity of machine learning in this field has soared in recent years Unfortunately on many occasions the use of machine learning has overshadowed epidemiological practice thus limiting the production of results that have genuine clinical relevance Without careful

integration there is a real risk of losing the trust and confidence that machine learning has slowly gained within the clinical field

Transformative Approaches to Patient Literacy and Healthcare Innovation Garcia, Manuel B., de Almeida, Rui Pedro Pereira, 2024-03-22 The disconnect between technology and traditional practices poses a significant challenge. Many healthcare professionals and individuals struggle to navigate the influx of emerging technologies, hindering the full realization of their potential in revolutionizing health literacy and medical practice. The lack of cohesive understanding and integration of technologies like mobile applications, wearable devices, artificial intelligence, and telemedicine impedes the seamless delivery of healthcare services and obstructs individuals from actively managing their health. Transformative Approaches to Patient Literacy and Healthcare Innovation offers a comprehensive solution to bridge the gap between healthcare and technology. Delving into the dynamic fusion of these domains, it unravels the transformative power of technology applications, showcasing how they enhance health literacy and empower individuals to make informed decisions about their well-being. By providing insights into the integration of mobile health apps, electronic health records, extended reality, artificial intelligence, and more, the book equips readers with the knowledge needed to navigate the evolving healthcare landscape with confidence.

Synergizing Data Envelopment Analysis and Machine Learning for Performance Optimization in Healthcare Ajibesin, Adeyemi Abel, G., Naveen Sundar, Thangavel, Senthil Kumar, 2025-05-02 Healthcare systems face the challenge of delivering high quality care while efficiently managing costs and resources. Traditional methods of performance evaluation often fall short when addressing the complex and diverse nature of healthcare operations. Data envelopment analysis (DEA) has been used to measure the efficiency of healthcare providers, but its linear deterministic nature limits its adaptability to dynamic environments. In contrast, machine learning (ML) can handle complex non-linear relationships and high dimensional data, offering deeper insights and predictive capabilities. The synergy between DEA and ML presents an opportunity to overcome these limitations and drive more effective performance optimization. It leads to efficiency assessments through predictive analytics and improved resource allocation with data-driven insights, and optimizing clinical pathways and decision support systems for better patient outcomes. Synergizing Data Envelopment Analysis and Machine Learning for Performance Optimization in Healthcare explores the integration of DEA and ML to enhance performance optimization in healthcare, improving efficiency, care quality, and resource management. It examines theoretical foundations, methodological innovations, and practical applications, providing a comprehensive resource with a key focus on development of algorithms to address challenges in healthcare optimization. Covering topics such as healthcare equipment manufacturing, human augmentation, and robotic surgery, this book is an excellent resource for hospital administrators, clinical managers, clinical decision makers, policymakers, public health officials, professionals, researchers, scholars, academics, and more.
