Introduction to Logistics Systems Management Gianpaolo Ghiani, Gilbert Laporte, Roberto Musmanno, 2022-10-31
INTRODUCTION TO LOGISTICS SYSTEMS MANAGEMENT The updated new edition of the award winning introductory textbook on logistics system management. *Introduction to Logistics Systems Management* provides an in depth introduction to the methodological aspects of planning, organization and control of logistics for organizations in the private, public and non profit sectors. Based on the authors extensive teaching, research and industrial consulting experience, this classic textbook is used in universities worldwide to teach students the use of quantitative methods for solving complex logistics problems. Fully updated and revised, the third edition places increased emphasis on the complexity and flexibility required by modern logistics systems. In this context, the extensive use of data, descriptive analytics, predictive models and optimization techniques will be invaluable to support the decisions and actions of logistics and supply chain managers. Throughout the book, brand new case studies and numerical examples illustrate how various methods can be used in industrial and service logistics to reduce costs and improve service levels. The book includes new models and techniques that have emerged over the past decade, describes methodologies for logistics decision making, forecasting, logistics system design, procurement, warehouse management and freight transportation management. It includes end of chapter exercises, Microsoft Excel files and Python computer codes for each algorithm covered, and includes access to a companion website with additional exercises, links to video tutorials and supplementary teaching material. To facilitate creation of course material, additional LaTeX source data containing the formulae, optimization models, tables and algorithms described in the book is available to instructors. *Introduction to Logistics Systems Management* Third Edition remains an essential textbook for senior undergraduate and graduate students in engineering, computer science and management science courses. It is also a highly useful reference for academic researchers and industry practitioners alike.

This fully updated new edition provides new coverage of important topics like generational differences, sexual harassment, AI and cybersecurity. Students learn about management in the real world with 18 new cases, including cases on the NBA, H M, Netflix and Peloton. This title is accompanied by a complete teaching and learning package.

Human Resources for the Non-HR Manager Carol T. Kulik, Elissa L. Perry, 2023-05-02
Human Resources for the Non-HR Manager gives every manager, regardless of their functional role, access to cutting edge research and evidence based recommendations so they can approach their people management responsibilities with confidence. Day to day people

management is increasingly the responsibility of front line managers not HR professionals. But managers are often poorly prepared for these responsibilities; they receive little training and sometimes have little interest in HR. People management is never easy and it is particularly challenging in COVID 19's next normal workplace where managers must engage diverse employees across a wide range of working arrangements. This book focuses on the special relationship that line managers have with their employees and describes managers' responsibilities across the entire employee lifecycle from front end recruiting and hiring through to long term retention. The content is grounded in rigorous academic research but the book's conversational tone conveys basic principles without technical jargon. Each chapter includes Manager's Checkpoints to help readers apply the material to their own workplace and Manager's Knots that address gray areas inherent in people management. The book is designed for any reader currently working as a line manager or aspiring to a managerial role who wants to improve their people management skills. Combined with a complete instructor package the book provides different types of activities to accompany each chapter. Some Assembly Required In the News and Undercover Manager. The activities can be found in the Instructor Resources Download Hub and are designed to align with student cohorts with varying levels of experience. A full suite of regularly updated resources for students and instructors can be found on the authors own website <https://www.nonhrmanager.com>

Research Anthology on Privatizing and Securing Data Management Association, Information Resources, 2021-04-23. With the immense amount of data that is now available online security concerns have been an issue from the start and have grown as new technologies are increasingly integrated in data collection, storage and transmission. Online cyber threats, cyber terrorism, hacking and other cybercrimes have begun to take advantage of this information that can be easily accessed if not properly handled. New privacy and security measures have been developed to address this cause for concern and have become an essential area of research within the past few years and into the foreseeable future. The ways in which data is secured and privatized should be discussed in terms of the technologies being used, the methods and models for security that have been developed and the ways in which risks can be detected, analyzed and mitigated. The Research Anthology on Privatizing and Securing Data reveals the latest tools and technologies for privatizing and securing data across different technologies and industries. It takes a deeper dive into both risk detection and mitigation including an analysis of cybercrimes and cyber threats along with a sharper focus on the technologies and methods being actively implemented and utilized to secure data online. Highlighted topics include information governance and privacy, cybersecurity, data protection challenges in big data, security threats and more. This book is essential for data analysts, cybersecurity professionals, data scientists, security analysts, IT specialists, practitioners, researchers, academicians and students interested in the latest trends and technologies for privatizing and securing data.
