VKI, 1984 *Hydrology - Current Research and Future Directions* Murat Eyvaz, Ahmed Albahnasawi, Motasem Y. D. Alazaiza, 2024-06-05

Hydrology Current Research and Future Directions provides a comprehensive review of hydrological research using field investigations and integrated modeling in locations ranging from arid areas to regions with abundant water. Thanks to the contributions of expert researchers hailing from Brazil, Saudi Arabia, Sudan, India, and other countries, the complex dynamics of the world's water systems are better understood. The book discusses the pressure of climate change on water ecosystems and complex water management in cities. It provides information that can guide both practitioners and policymakers in the sustainable management of water through integrated water management and advanced treatment technologies. With its multidisciplinary research and approaches, this book opens the door not only to existing hydrology science but also to new partnerships in studies on sustainable water management.

At a time when each Society had its own medium of propagation of its researches in the form of Transactions, Proceedings, Journals etc a need was strongly felt for bringing out a journal devoted exclusively to the study and advancement of Indian culture in all its aspects. This encouraged Jas Burgess to launch the Indian antiquary in 1872. The scope was in his own words as wide as possible incorporating manners and customs, arts, mythology, feasts, festivals and rites, antiquities and the history of India. Another laudable aim was to present the readers abstracts of the most recent researches of scholars in India and the West Indian antiquary also dealt with local legends, folklore, proverbs etc. In short Indian antiquary was entirely devoted to the study of MAN the Indian in all spheres. introduction to facsimile volumes published 1985
