Converting STEM into STEAM Programs Arthur J. Stewart, Michael P. Mueller, Deborah J. Tippins, 2020-02-27. This book examines the push and pull of factors contributing to and constraining conversion of STEM (science, technology, engineering, and math) education programs into STEAM (science, technology, engineering, math, and arts) education programs. The chapters in this book offer thought-provoking examples, theory, and suggestions about the advantages, methods, and challenges involved in making STEM to STEAM conversions at levels ranging from K-12 through graduate university programs. A large driving force for STEM to STEAM conversions is the emerging awareness that the scientific workforce finds itself less than ideally prepared when engaging with so-called wicked problems, the complex suite of emerging multifaceted issues such as global climate change, social injustice, and pandemic diseases. Dealing with these issues requires cross-disciplinary expertise and the ability to insert technical and scientific understanding.
