Artificial Intelligence David R. Martinez, Bruce M. Kifle, 2024-06-11 The first text to take a systems engineering approach to artificial intelligence AI from architecture principles to the development and deployment of AI capabilities. Most books on artificial intelligence AI focus on a single functional building block such as machine learning or human machine teaming. Artificial Intelligence takes a more holistic approach addressing AI from the view of systems engineering. The book centers on the people process technology triad that is critical to successful development of AI products and services. Development starts with an AI design based on the AI system architecture and culminates with successful deployment of the AI capabilities. Directed toward AI developers and operational users this accessibly written volume of the MIT Lincoln Laboratory Series can also serve as a text for undergraduate seniors and graduate level students and as a reference book. Key features: In depth look at modern computing technologies. Systems engineering description and means to successfully undertake an AI product or service development through deployment. Existing methods for applying machine learning operations (MLOps) AI system architecture including a description of each of the AI pipeline building blocks. Challenges and approaches to attend to responsible AI in practice. Tools to develop a strategic roadmap and techniques to foster an innovative team environment. Multiple use cases that stem from the authors MIT classes as well as from AI practitioners, AI project managers, early career AI team leaders, technical executives and entrepreneurs. Exercises and Jupyter notebook examples.

Fourth Congress on Intelligent Systems Sandeep Kumar, Balachandran K., Joong Hoon Kim, Jagdish Chand Bansal, 2024-03-26 This book is a collection of selected papers presented at the Fourth Congress on Intelligent Systems CIS 2023 organized by CHRIST Deemed to be University Bangalore India under the technical sponsorship of the Soft Computing Research Society India during September 4-5 2023. It includes novel and innovative work from experts, practitioners, scientists, and decision makers from academia and industry. It covers topics such as the Internet of Things, information security, embedded systems, real time systems, cloud computing, big data analysis, quantum computing, automation systems, bio inspired intelligence, cognitive systems, cyber physical systems, data analytics, data web mining, data science, intelligence for security, intelligent decision making systems, intelligent information processing, intelligent transportation, artificial intelligence for machine vision, imaging sensors technology, image segmentation, convolutional neural network, image video classification, soft computing for machine vision, pattern recognition, human computer interaction, robotic devices and systems, autonomous vehicles, intelligent control systems, human motor control, game playing, evolutionary algorithms, swarm optimization, neural network, deep learning, supervised learning, unsupervised learning, fuzzy logic, rough sets, computational optimization, and neuro fuzzy systems.

Event-Database Architecture for Computer Games Rodney Quaye, 2025-07-25 Event Database Architecture for Computer Games proposes the first explicit software architecture for game development, answering the problem of building modern computer games with little or no game design. In this volume an example of a practical

production process based on the software production process is explained including examples of the game design technical design data design and tools design in that process This volume includes a brief overview on how to optimise the results This leads on to an exploration of how staff especially Software Engineers typically view optimisation It also explains how the vision of the Engineers relates to the vision of the leadership of a project or company It describes how this leadership can also affect the efficacy of a production process including the Event Database Production Process This book will be of great interest to professional game developers involved in management roles such as Technical Directors and Game Producers and technical roles such as Tools Programmers UI Programmers Gameplay Programmers and Engineers as well as students studying game development and programming Rodney Quaye is Senior Software Development Engineer in Test at Build A Rocket Boy He has worked in the Computer Games industry for over 16 years He has worked at several Games Studios including Sumo Digital nDreams Supermassive Games Traveller s Tales Hotgen Oysterworld Second Impact Flaming Pumpkin Goldhawk Interactive Jagex Gusto Games Criterion Asylum Entertainment Codemasters and Deibus Studios The famous titles he has worked on include Burnout 2 and 3 for Criterion LMA Manager for Codemasters Runescape for Jagex Lego Worlds for Traveller s Tales and Everywhere for Build A Rocket Boy

Cloud Computing for Machine Learning and Cognitive Applications Kai Hwang,2017-07-07 The first textbook to teach students how to build data analytic solutions on large data sets using cloud based technologies This is the first textbook to teach students how to build data analytic solutions on large data sets specifically in Internet of Things applications using cloud based technologies for data storage transmission and mashup and AI techniques to analyze this data This textbook is designed to train college students to master modern cloud computing systems in operating principles architecture design machine learning algorithms programming models and software tools for big data mining analytics and cognitive applications The book will be suitable for use in one semester computer science or electrical engineering courses on cloud computing machine learning cloud programming cognitive computing or big data science The book will also be very useful as a reference for professionals who want to work in cloud computing and data science Cloud and Cognitive Computing begins with two introductory chapters on fundamentals of cloud computing data science and adaptive computing that lay the foundation for the rest of the book Subsequent chapters cover topics including cloud architecture mashup services virtual machines Docker containers mobile clouds IoT and AI inter cloud mashups and cloud performance and benchmarks with a focus on Google s Brain Project DeepMind and X Lab programs IBKai HwangM SyNapse Bluemix programs cognitive initiatives and neurocomputers The book then covers machine learning algorithms and cloud programming software tools and application development applying the tools in machine learning social media deep learning and cognitive applications All cloud systems are illustrated with big data and cognitive application examples

AI Systems Performance Engineering Chris Fregly,2025-11-11 Elevate your AI system performance capabilities with this definitive guide to maximizing efficiency across every layer of your AI infrastructure In

today's era of ever growing generative models AI Systems Performance Engineering provides engineers researchers and developers with a hands on set of actionable optimization strategies Learn to co optimize hardware software and algorithms to build resilient scalable and cost effective AI systems that excel in both training and inference Authored by Chris Fregly a performance focused engineering and product leader this resource transforms complex AI systems into streamlined high impact AI solutions Inside you'll discover step by step methodologies for fine tuning GPU CUDA kernels PyTorch based algorithms and multinode training and inference systems You'll also master the art of scaling GPU clusters for high performance distributed model training jobs and inference servers The book ends with a 175 item checklist of proven ready to use optimizations Codesign and optimize hardware software and algorithms to achieve maximum throughput and cost savings Implement cutting edge inference strategies that reduce latency and boost throughput in real world settings Utilize industry leading scalability tools and frameworks Profile diagnose and eliminate performance bottlenecks across complex AI pipelines Integrate full stack optimization techniques for robust reliable AI system performance

Innovation

Management Jin Chen,Gang Zheng,2019-03-22 The key for lasting competitive advantage lies in embracing innovation as a core value and managing it effectively Innovation Management provides a comprehensive overview of innovation theory and a framework for implementation intended for business school students of Innovation Management managers and practitioners alike In this new text authors Jin Chen and Gang Zheng examine innovation from the perspectives of strategy internal processes resource management and organizational culture Numerous case studies illustrating both successes and failures in innovation include Tesla P G Apple Uber Google NVIDIA Haier Group Motorola and Nokia Starting from a systematic introduction to the types process and models of innovation the authors present a strategical management framework that includes models for indigenous innovation total innovation open innovation and holistic innovation They outline the key roles played by management of capital information and knowledge systems human resources and IP rights Organizational systems that are designed to stimulate innovation within the corporation are detailed and finally the authors examine the future of innovation management focusing the need for sustainable innovation that recognized the importance of environmental and ecological concerns
