Produced Water Kenneth Lee,Jerry Neff,2011-09-18 A state of the art review of scientific knowledge on the environmental risk of ocean discharge of produced water and advances in mitigation technologies In offshore oil and gas operations produced water the water produced with oil or gas from a well accounts for the largest waste stream in terms of volume discharged Its discharge is continuous during oil and gas production and typically increases in volume over the lifetime of an offshore production platform Produced water discharge as waste into the ocean has become an environmental concern because of its potential contaminant content Environmental risk assessments of ocean discharge of produced water have yielded different results For example several laboratory and field studies have shown that significant acute toxic effects cannot be detected beyond the point of discharge due to rapid dilution in the receiving waters However there is some preliminary evidence of chronic sub lethal impacts in biota associated with the discharge of produced water from oil and gas fields within the North Sea As the composition and concentration of potential produced water contaminants may vary from one geologic formation to another this conference also highlights the results of recent studies in Atlantic Canada *Oil Spill Dispersants Committee on Understanding Oil Spill Dispersants: Efficacy and Effects*,Ocean Studies Board,2005

Approximately 3 million gallons of oil or refined petroleum products are spilled into U S waters every year Oil dispersants chemical agents such as surfactants solvents and other compounds are used to reduce the effect of oil spills by changing the chemical and physical properties of the oil By enhancing the amount of oil that physically mixes into the water dispersants can reduce the potential that a surface slick will contaminate shoreline habitats Although called for in the Oil Pollution Act of 1990 as a tool for minimizing the impact of oil spills the use of chemical dispersants has long been controversial This book reviews the adequacy of existing information and ongoing research regarding the effectiveness of dispersants as an oil spill response technique as well as the effect of dispersed oil on marine and coastal ecosystems Oil Spill Dispersants also includes recommended steps for policy makers faced with making hard choices regarding the use of dispersants as part of spill contingency planning efforts or during actual spills Human Behavior ,1979 Guide to Your Career Alan B.
