Computer Simulation Analysis of Biological and Agricultural Systems Barney K. Huang,1994-03-22 Computer Simulation Analysis of Biological and

Agricultural Systems focuses on the integration of mathematical models and the dynamic simulation essential to system analysis design and synthesis. The book emphasizes the quantitative dynamic relationships between elements and system responses. Problems of various degrees of difficulty and complexity are discussed to illustrate methods of computer aided design and analysis that can bridge the gap between theories and applications. These problems cover a wide variety of subjects in the biological and agricultural fields. Specific guidelines and practical methods for defining requirements, developing specifications and integrating system modeling early in simulation development are included as well. Computer Simulation Analysis of Biological and Agricultural Systems is an excellent text and self guide for agricultural engineers, agronomists, foresters, horticulturists, soil scientists, mechanical engineers and computer simulators.
