It includes the design of innovative Robot Process Automation RPA concepts the discussion of related research fields e.g. Artificial Intelligence AI the evaluation of existing software products and findings from real life implementation projects. Similar to the substitution of physical work in manufacturing blue collar automation Robotic Process Automation tries to substitute intellectual work in office and administration processes with software robots white collar automation. The starting point for the development of RPA was the observation that despite the use of process oriented enterprise systems such as ERP CRM and BPM systems additional manual activities are still indispensable today. In the RPA approach these manual activities are learned and automated by software robots either by defining rules or by observing manual activities. RPA is related to business process management machine learning and artificial intelligence. Tools for RPA originated from dedicated stand alone software. Today RPA functionalities are also integrated into elaborated process management suites. From a conceptual perspective RPA can be structured into input components sensors in the wide sense an intelligence center and output components actuators in the wide sense. From a strategic perspective the impact of RPA can be related to the support of existing tasks the complete substitution of human activities and the innovation of processes.

as well as business models At present high expectations are related to the use of RPA in the improvement of software supported business processes Manual activities are learned and automated by software robots that interact with existing applications via the presentation layer In combination with artificial intelligence AI as well as innovative interfaces e g voice recognition RPA creates a novel level of automation for office and administration processes Its benefit potential reaches a return on investment ROI up to 800% that is documented in various case studies      **InfoWorld** ,2000-12-11 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects      Microelectronics Monitor ,1988      **Paperbound Books in Print** ,1991      **Whitaker's Cumulative Book List** ,1983      Books in Series ,1979      *Books in Print Supplement* ,2002      **Solution Manual for Principles of Logic Design** John N.
