accepted treatment option for many mental health professionals. With its emphasis on client strengths and short term treatment, SFBT is well suited to school contexts given the wide array of problems and the large caseloads of most school based practitioners. This book, as part of the Oxford Workshop Series, will give school social workers the tools they need to understand and use SFBT with students, families, teachers, and administrators. In clear language, the authors briefly cover the history of the development of SFBT, highlighting the pioneering work of Insoo Kim Berg and others that led to the development of the Working on What Works (WOWW) program for middle schools, as well as several treatment manuals produced in collaboration with the European Brief Therapy Association and North American Brief Therapy Association. Careful not to overstate results from a recent meta analysis, the authors show where SFBT has been shown to be effective, especially with families and for classroom behavior problems, and how school professionals can incorporate its principles into their daily practice. Case examples describe in detail how school professionals have used SFBT with a group of students with text anxiety to create a family health and employment fair in an under resourced school with grandparents raising their grandchildren, and by coaching teachers to identify and solve classroom behavior issues with their students. An entire chapter tells the story of the Garza Independence High School in Austin, a solution focused school designed to engage urban high school dropouts or students at risk of dropping out to help them finish high school. With 52% of Garza graduates enrolled in a post secondary education program, outcomes are promising, and similar schools are being developed around the country. Though the authors take care not to overstate the relevance and utility of SFBT in all situations, they make the techniques involved comprehensive in a way that practitioners at every skill level will find valuable.

*Solution-oriented Social Work Practice* Gilbert J. Greene, Mo Yee Lee, 2011

Too often in practice there is a tendency to pathologize clients requiring a diagnosis as part of the helping relationship. Suppose, however, that most of the client problems that social workers encounter have more to do with the vagaries of life and not with what clients are doing wrong. This powerful idea is the philosophy behind the strengths based approaches to social work. This groundbreaking practice handbook takes this concept one step further, combining the different strengths based approaches into an overarching model of solution oriented social work for greater impact. The strengths perspective emphasizes client strengths, goal setting, and a shared definition of positive outcome. Solution focused therapy approaches ongoing problems when they have temporarily abated, amplifying exceptions as solutions. This natural but rarely explored pairing is one component in the challenging and effective practice framework presented here by the authors, two seasoned practitioners with over 50 years of combined experience. By integrating the most useful aspects of the major approaches, a step by step plan for action emerges. With this text in hand, you will integrate elements from the strengths perspective, solution focused therapy, narrative therapy, and the strategic therapy of the Mental Research Institute. The MRI approach into an effective and eclectic framework. Build and practice your skills using case examples, transcripts, and practical advice. Equip yourself with the tools you need to emphasize clients strengths. Challenge

the diagnosis first medical model of behavioral health care Collaborate with clients to get past thinking first order change and more to acting outside the box second order change Learn to work with a wide variety of clients including individuals groups and families involuntary clients clients with severe mental illness and clients in crisis For any student or practitioner interested in working with clients towards collaborative and empowering change this is the essential text
