Chapter 2

STOCK INVESTMENTS — INVESTOR ACCOUNTING AND REPORTING

Answers to Questions

- 1 Only the investor's accounts are affected when outstanding stock is acquired from existing stockholders. The investor records the investment at its cost. Since the investee company is not a party to the transaction, its accounts are not affected.
Both investor and investee accounts are affected when unissued stock is acquired directly from the investee. The investor records the investment at its cost and the investee adjusts its asset and owners' equity accounts to reflect the issuance of previously unissued stock.
- 2 Goodwill arising from an equity investment of 20 percent or more is not recorded separately from the investment account. Under the equity method, the investment is presented on one line of the balance sheet in accordance with the one-line consolidation concept.
- 3 Dividends received from earnings accumulated before an investment is acquired are treated as decreases in the investment account balance under the fair value/cost method. Such dividends are considered a return of a part of the original investment.
- 4 The equity method of accounting for investments increases the investment account for the investor's share of the investee's income and decreases it for the investor's share of the investee's losses and for dividends received from the investee. In addition, the investment and investment income accounts are adjusted for amortization of any investment cost-book value differentials related to the interest acquired. Adjustments to the investment and investment income accounts are also needed for unrealized profits and losses from transactions between the investor and investee companies. A fair value adjustment is optional under SFAS No. 139.
- 5 The equity method is referred to as a one-line consolidation because the investment account is reported on one line of the investor's balance sheet and investment income is reported on one line of the investor's income statement (except when the investee has extraordinary or cumulative-effect type adjustments). In addition, the investment income is computed such that the parent company's income and stockholders' equity are equal to the consolidated net income and consolidated stockholders' equity that would result if the statements of the investor and investee were consolidated.
- 6 If the equity method of accounting is applied correctly, the income of the parent company will generally equal the controlling interest share of consolidated net income.
- 7 The difference in the equity method and consolidation lies in the detail reported, but not in the amount of income reported. The equity method reports investment income on one line of the income statement whereas the details of revenues and expenses are reported in the consolidated income statement.
- 8 The investment account balance of the investor will equal underlying book value of the investee if (a) the equity method is correctly applied, (b) the investment was acquired at book value which was equal to fair value, the pooling method was used, or the cost-book value differentials have all been amortized, and (c) there have been no intercompany transactions between the affiliated companies that have created investment account-book value differences.
- 9 The investment account balance must be converted from the cost to the equity method when acquisitions increase the interest held to 20 percent or more. The amount of the adjustment is the difference between the investment income reported under the cost method in prior years and the income that would have been reported if the equity method of accounting had been used. Changes from the cost to the equity method of accounting for equity investments are changes in the reporting entity that require restatement of prior years' financial statements when the effect is material.

Solution Manuals Advanced Accounting Midterm:

Advanced Accounting Debra C. Jeter, Paul K. Chaney, 2019-01-30 Advanced Accounting delivers an in depth comprehensive introduction to advanced accounting theory and application using actual business examples and relevant news stories to demonstrate how core principles translate into real world business scenarios. Clearly defined and logically organized Learning Objectives aid in student comprehension while highlighted Related Concepts illustrate how individual concepts fit into the larger picture. Short answer questions throughout the chapter allow students to test their knowledge before reaching the more in depth end of chapter questions promoting a deeper understanding of both technical and conceptual aspects of the field. Written by active accounting researchers this text brings clarity and flexibility to the central ideas underlying business combinations, consolidated financial statements, foreign currency transactions, partnerships, non profit accounting and more. This new Seventh Edition has been updated to reflect the latest changes to FASB and GASB standards allowing students to build a skill set based on up to date practices. With a student oriented pedagogy designed to enhance comprehension, promote engagement and build real world understanding, this user friendly book provides an essential foundation in current advanced accounting methods and standards. Ebook: Advanced Accounting Joe Ben Hoyle, Thomas Schaefer, Timothy Doupnik, 2014-10-16 The approach used by Hoyle, Schaefer, and Doupnik in the new edition allows students to think critically about accounting just as they will do while preparing for the CPA exam and in their future careers. With this text, students gain a well balanced appreciation of the Accounting profession. As Hoyle 12e introduces them to the field's many aspects, it often focuses on past controversies and present resolutions. The text continues to show the development of financial reporting as a product of intense and considered debate that continues today and into the future. The writing style of the eleven previous editions has been highly praised. Students easily comprehend chapter concepts because of the conversational tone used throughout the book. The authors have made every effort to ensure that the writing style remains engaging, lively, and consistent, which has made this text the market leading text in the Advanced Accounting market. The 12th edition includes an increased integration of IFRS as well as updated accounting standards.

Advanced Accounting Arnold J. Pahler, 2006 The most reader friendly text on the market, ADVANCED ACCOUNTING brings real world accounting topics to the student's level presenting advanced concepts and issues in a flexible step by step approach. This is the only advanced book that completely separates the following three major concepts dealt with in the consolidations area: 1) the general concept of consolidating, 2) the concept of a non controlling interest, and 3) the change or no change in basis of accounting concepts for business combinations. Separating these concepts makes it much easier for students than having to simultaneously learn multiple concepts. *Books and Pamphlets, Including Serials and Contributions to Periodicals* Library of Congress, Copyright Office, 1968. *Advanced Accounting* Floyd A. Beams, 2006 For junior and senior level Advanced Accounting courses, Advanced Accounting 9e uses the complete equity method to allow

students to focus on accounting concepts rather than bookkeeping techniques in learning consolidation material The presentation of consolidation material and the use of excerpts from popular business press and references to real world companies and governmental and non profit institutions are used to illustrate key concepts and maintain a strong student orientation
