utilized as a software tool in problem solving The principal goal of this book is to furnish the background needed to generate  
numerical solutions to a variety of problems Specific applications involving root finding interpolation curve fitting matrices  
derivatives integrals and differential equations are discussed and the broad applicability of MATLAB demonstrated This book  
employs MATLAB as the software and programming environment and provides the user with powerful tools in the solution of  
numerical problems Although this book is not meant to be an exhaustive treatise on MATLAB MATLAB solutions to problems  
are systematically developed and included throughout the book MATLAB files and scripts are generated and examples  
showing the applicability and use of MATLAB are presented throughout the book Wherever appropriate the use of MATLAB  
functions offering shortcuts and alternatives to otherwise long and tedious numerical solutions is also demonstrated At the  
end of every chapter a set of problems is included covering the material presented A solutions manual to these exercises is  
available to instructors      **Physical Chemistry** Robert J. Silbey, Robert A. Alberty, George A. Papadantonakis, Mounji G.
