Teaching with a Strength-Based Approach Steven Baron, 2023-06-01 Helping students improve doesn't have to mean remediating their deficits. In this important book, Steven Baron shows the benefits of a strength-based approach that instead emphasizes students' assets and capabilities, making them feel more connected to teachers and peers and more engaged in learning. You'll learn practical research-backed ways to help students of all grade levels identify and celebrate their strengths, develop self-confidence and a growth mindset, build intrinsic motivation, overcome a fear of making mistakes, manage their feelings, focus on gratitude, and more. You'll also discover ways to create a more strength-based Individual Education Plan (IEP), increase your own resilience as a teacher, and build a strength-based culture throughout your school and district. The appendix provides a variety of exercises you can use to help students focus on their strengths, foster kindness, and understand the impact of bullying. Students spend approximately 1300 hours during the year with teachers; this resource will help you make this time as affirming as possible so students are ready to learn and grow.

Gender and Finance Ylva

Baeckström, 2022-02-25 This book examines the world of finance and the role of gender within it. It looks at the financial services industry, arguably the most powerful and remunerative sector that exists, and shows how it was created by men for men. The author explains how historically women were excluded, how minimal progress has been made, and outlines how the sector still needs to change to function effectively in a modern, equal opportunities world. Addressing gender inequality in financial services is of utmost urgency and importance because of the extent to which it affects women in all stages of life.

Women's exclusion in financial services is also mirrored by how men have been excluded from parenting through a similar set of societal expectations government legislation and corporate policies. The author maintains that to succeed we need to address both financial services and parenting. To do so we need regulatory support. Because of its power and dominance the financial services industry has the opportunity to lead this change and to champion gender equal practices. These practices are economically beneficial to all participants not only female employees and consumers. We all need these benefits as we rebuild our economies following the COVID 19 pandemic. The book makes an important contribution to the critical and increasing awareness of gender concerns. It presents insights drawn from original research and data about gender biases. The book is an essential secondary text for a range of university courses including economics, finance and accounting, business studies and gender related courses as well as MBAs and Executive Education programmes that focus on gender in business. It is also a must read for policy makers, managers in financial services institutions and any other businesses that seek to attract the growing market of female consumers, employees and business leaders. *Transformational Learning Experiences*
