understand the user's expectations. Besides the usage patterns have to be described especially against the background of security aspects. As mentioned before, recent analyses did not specifically ask what the user expects from a smartphone. Hence the main objective of this work is to get a broad picture on how smartphones are used today and what users expect, taking into consideration security aspects. An international web-based online survey was designed and performed to measure and analyze users' behaviour when using smartphones with the aim of finding out what they want and expect from a smartphone. The main goals were to identify user needs in the context of smartphones to analyze their knowledge and acquisition to security aspects and to get significant data about the user's behaviour. The main findings of the survey are that on the one hand most of the users want a smartphone to provide classic mobile phone features such as performing phone calls, writing messages or storing contacts. On the other hand they want a smartphone to provide mobile internet access, navigation features, multimedia aspects, a comfortable usability and a good look.

Haunted Empire Yukari Iwatani Kane, 2014-03-18 Former Wall Street Journal technology reporter Yukari Iwatani Kane delves deep inside Apple in the two years since Steve Jobs's death, revealing the tensions and challenges CEO Tim Cook and his team face as they try to sustain Jobs's vision and keep the company moving forward. Steve Jobs's death raised one of the most pressing questions in the tech and business worlds: Could Apple stay great without its iconic leader?
