## **Sint Geertruids Of Pepergasthuis:**

**Sint Geertruids- of Pepergasthuis** Edith den Hartigh, L. Kroon, 1991      **Poor Relief and Protestantism** Timothy G. Fehler, 2018-04-17 This is a study of the organisation and practical operation of the system of poor relief in Emden from the late 15th century to the end of the 16th. The city went through dramatic economic, confessional and constitutional changes during this period and so offers an ideal setting for the study of the emergence and development of a highly organised multi-jurisdictional system of social welfare in the early modern period. Utilising account books, church council minutes, wills, contracts, correspondence and guild records, it focuses on the day-to-day operation of poor relief, how the many diverse institutions actually functioned. As elsewhere in Europe, the Reformation did not immediately result in swift changes in poor relief; the Roman Catholic components of the administration of social welfare were dissolved and replaced gradually. It was only when the vast changes in religious, social and economic life which occurred at the middle of the 16th century forced matters that the methods of relief for the needy were revolutionised. The city was flooded with refugees from the Dutch revolt; there were widespread and severe economic difficulties caused by bad harvests and skyrocketing prices, and the church underwent a period of intense Calvinisation, only then were Reformed institutions and methods introduced. At times, religious arguments dominated the poor relief debate, while at others the social welfare system was barely affected. The effectiveness of the new systems and institutions is illuminated by an analysis of the recipients of relief during the second half of the 16th century.      **Frontiers of Finance: The Political Economy of Public Debt in the Dutch Republic** H. Alberto Feenstra, 2025-12-18 This book analyses the political economy of provincial public debt within the federal Dutch Republic. **Frontiers of Finance: The Political Economy of Public Debt in the Dutch Republic** shows that the domestic effect of Holland's financial revolution and Amsterdam's subsequent rise to an international financial centre was limited. Instead, the fiscal and legal fragmentation caused differences in risk, capital supply, transaction costs and consequently borrowing costs. The merits of Holland's financial revolution were thus not transferable to another context. The results are relevant for wider debates about the role of institutions and the financial sector for economic growth.      *Groningen in zijn verleden en zijn heden* Jan Suringa, 1899

It explains why hofjes have been a natural and attractive part of the urban fabric of the Netherlands for six centuries and why they continue to appeal to new generations. The appeal of hofje architecture lies in its ability to renew its medieval archetype: an enclosed living environment around a shared green garden. Hofjes allow both

residents and visitors to enjoy an especially serene and intimate atmosphere that contrasts surprisingly with the urban experience of hustle and bustle The drawings text and photography of Urban Oases take the reader to the capillaries of old Dutch cities and are relevant to an important contemporary global question How can high quality compact residential environments be created in twenty first century cities Inspired by this extraordinary architectural heritage the author addresses everyone who wants to contribute to a sustainable and liveable city This book is part of a series of open access books published jointly by TU Delft OPEN Publishing and nai010 *Bijdragen voor de geschiedenis der Nederlanden* ,1963
