Forced Migration in/to Canada Christina R. Clark-Kazak,2024-10-22 Forced migration shaped the creation of Canada as a settler state and is a defining feature of our contemporary national and global contexts Many people in Canada have direct or indirect experiences of refugee resettlement and protection trafficking and environmental displacement Offering a comprehensive resource in the growing field of migration studies Forced Migration in to Canada is a critical primer from multiple disciplinary perspectives Researchers practitioners and knowledge keepers draw on documentary evidence and analysis to foreground lived experiences of displacement and migration policies at the municipal provincial territorial and federal levels From the earliest instances of Indigenous displacement and settler colonialism through Black enslavement to statelessness trafficking and climate migration in today s world contributors show how migration as a human phenomenon is differentially shaped by intersecting identities and structures Particularly novel are the specific insights into disability race class social age and gender identity Situating Canada within broader international trends norms and structures both today and historically Forced Migration in to Canada provides the tools we need to evaluate information we encounter in the news and from government officials colleagues and non governmental

organizations It also proposes new areas for enquiry discussion research advocacy and action *Pockets of Change* Jane Stadler,Peta Mitchell,Adam Atkinson,Tricia Hopton,2011-04-29 The twelve essays collected in *Pockets of Change* locate adaptation within a framework of two overlapping if not simultaneous creative processes on the one hand adaptation is to be understood as an acknowledged transposition of an existing source that is the process of adapting from on the other hand adaption is also a process of purposeful shifting and evolving of creative practices in response to external factors including but not limited to other creative works in other words the process of adapting to This book explores adaptation then as an active practice of repetition and as a reactive process of development or evolution The essays also extend beyond the production transformation and interpretation of texts to interrogate the values and practices at work in cultural transition and transformation during periods of social and historical change Collectively the papers theorize adaptation by taking on three tasks first to examine the conditions under which the two processes of adaptation operate second to give an account of the space and moment in which the processes unfold the pockets of the title and finally to examine what emerges from pockets of adaptation While adapting from and adapting to are both processes that appear to preclude innovation in the way that they acknowledge and depend on external sources *Pockets of Change* demonstrates that adaptation is productive It not only references prior texts attitudes practices and media but it also invites us to re visit the past and to re think the present in new ways potentially giving narrative space to muted or occluded voices This book therefore brings together an innovative and varied range of approaches to interpretations and uses of adaptation challenging the assumption that an adaptation is simply either a re make or the act of turning one medium into another Adaptation then names not only the means by which texts are transformed but also the space in which that transformation takes place T **Study Guide** Raymond
