**Creating a Comprehensive Trauma Center** Mary Beth Williams, Lasse A. Nurmi, 2013-03-09 Early Thoughts on Creating Comprehensive Trauma Centers This volume has been many years in writing When Dr Donald Meichenbaum first suggested it and I approached my coauthor Lasse Nurmi it did not seem to be as formidable a task as it has become Interviewing the centers in this book has taken years to get responses to summarize those responses and to return the summaries for further comment Many centers have been created in that time others have suspended operation This volume does not claim to present even a majority of those centers However the ones contained herein are representative of what is out there The idea to create a comprehensive trauma center is not new The initial section of this forward examines thoughts I proposed as part of my comprehensive examination for my doctorate Many of the ideas proposed then 1989 seem to fit now It is my dream to put them into practice someday in the future THE COMPREHENSIVE EXAMINATION QUESTION In 1989 one question on the written comprehensive examination questions for my doctorate was If you were to create a comprehensive trauma center in your suburban area making use of what you have learned in your doctoral experience describe the organization of that center the mission structure personnel funding objectives and services it would offer Some of the conclusions reached then now seem applicable to the task at hand design ing comprehensive trauma centers CTCs for the 21st century

**The SAGE Encyclopedia of Educational Research, Measurement, and Evaluation** Bruce B. Frey, 2018-01-29 In an era of curricular changes experiments and high stakes testing educational measurement and evaluation are more important than ever In addition to expected entries covering the basics of traditional theories and methods The SAGE Encyclopedia of Educational Research Measurement and Evaluation also covers important sociopolitical issues and trends influencing the future of that research and practice Textbooks handbooks monographs and other publications focus on various aspects of educational research measurement and evaluation but to date there exists no major reference guide for students new to the field This comprehensive work fills that gap covering traditional areas while pointing the way to future developments Key Features Nearly 700 signed entries are contained in an authoritative work spanning four volumes and available in electronic and or print formats Although organized A to Z front matter includes a Reader s Guide grouping entries thematically to help students interested in a specific aspect of education research measurement and evaluation to more easily locate directly related entries Back matter includes a Chronology of the development of the field a Resource Guide to classic books journals and associations and a detailed Index Entries conclude with Further Readings and cross references to related entries The Index Reader s Guide themes and cross references combine to provide a robust search and browse in the electronic version

**The Broken Mirror** Katharine A. Phillips, 2005 Jane is an attractive woman in her mid thirties tall thin and stately She believes she is breathtakingly ugly

Tormented by what she sees as her huge nose crooked lip big jaw fat buttocks and tiny breasts she has not left her house in six years Though she lives in the same house as her mother she once went two years without seeing her When relatives come over she avoids them staying up on the third floor of the house even on Thanksgiving The one time she left the house forced to see a doctor she covered her face with bandages Eventually she attempted suicide I can't imagine any suffering greater than this If I had a choice I'd rather be blind or have my arms cut off I'd be happy to have cancer Jane has body dysmorphic disorder or BDD In *The Broken Mirror* Dr Katharine Phillips draws on years of clinical practice and detailed interviews with over 200 patients to bring readers the first book on this debilitating disease in which sufferers are obsessed by perceived flaws in their appearance Phillips describes severe cases such as Jane's but also a multitude of milder cases such as Carl a successful lawyer who uses his work to distract him from his supposedly thinning hair yet says that he thinks about it constantly Many sufferers are able to function very well in society but remain secretly obsessed by their hideous acne or horrible nose sneaking constant peeks at a pocket mirror or spend hours at a time redoing makeup According to Phillips research BDD afflicts approximately 2% of the population or nearly 5 million people It is not an uncommon disorder simply a hidden one since sufferers are often embarrassed to tell even their closest friends about their concerns one woman after fifty years of marriage still felt too uncomfortable to reveal her preoccupation to her husband Besides the fascinating story of the disease itself *The Broken Mirror* is also a literally lifesaving handbook for sufferers their families and their doctors Left untreated the torment of BDD can lead to psychiatric hospitalization and sometimes suicide With treatment many sufferers are able to lead normal lives Phillips provides a quick self assessment questionnaire helping readers distinguish between normal concern with appearance and the obsession of BDD to determine whether they or someone they know have BDD She includes warning signs for dermatologists and plastic surgeons since they are the medical professionals who see BDD sufferers most often as they continually seek to fix their looks Other chapters outline effective treatments for BDD using drugs and cognitive behavioral therapy answering often asked questions about treatments Finally Phillips includes a chapter aimed at the friends and families of BDD sufferers Profoundly affected by the disease themselves since sufferers often refuse to attend weddings and other family events or constantly ask loved ones for reassurance about their looks those who care about someone with BDD will find both helpful advice and reassurance in this indispensable book *The Broken Mirror* the first book on this underrecognized disorder is essential reading for the psychiatrists mental health professionals and other physicians who see these often undiagnosed patients for the friends and family concerned and upset by a loved one who won't believe their reassurances and for the millions who suffer from BDD in silence and secrecy
