COMPACT EXCAVATOR EC45

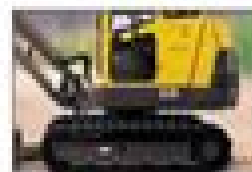

Even more efficient !

Like all Volvo machines, the
EC45 develops an impressive
level of performance.
The bucket force and dig-
ging depth are amongst the
best on the market to give
you improved productivity
on all your sites.

Excellent equipment performance

The bucket has a new large range
of movements (new ISOPE). This
characteristic guarantees a good attack
and great resistance at all depths.

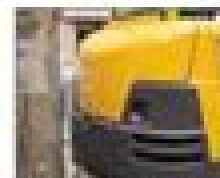

Long chassis for more stability

The considerable length of the
track provides exceptional stability
and allows more impact and strain
while working ground surface.

Valve quick coupling

The exclusive Volvo quick coupling
enables an accessory to be locked to the
bucket quickly without losing the
operator's safe working area for other
machines in hydraulic.

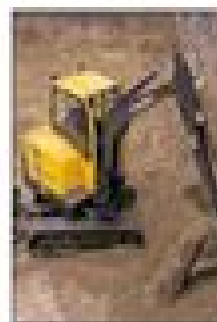

Compact rear impact protection

The new compact dimensions of the
Volvo machine enable them to
work safely in the narrowest sites.
The reinforced shape of the counter-
weight protects the machine with
excellent protection against all impacts.

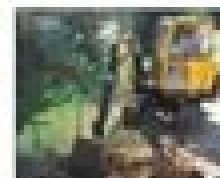

Locking of the offset arm

The offset arm is equipped with a
locking valve which blocks the arm
and prevents it from sliding. The
result: the boom's effort is totally lost
in the position chosen by the operator
even during long and difficult work.

Load-lowering system : operator has a compact excavator boom as easy to operate.

Boom movements independent of
movement - the hydraulic
load-lowering system fixed to the EC45
machine represents the best available
technology.

The boom effort for working obliquely a wall

The hydraulic effort of the boom
enables it possible to reduce the
overall dimensions of the excavator
and to work obliquely a wall.
