Longevity and Geriatrics

Hülya Çakmur, 2025-10-29 The physical aging process which results in the aging of cells, tissues, and organs varies differently in each individual due to the influence of environmental and life factors. Medical science has long been working to slow down or even stop and reverse the aging process. With the unraveling of the human genetic code, efforts to genetically intervene in the aging process have accelerated, and animal experiments have proven that this is possible. Today many molecules have been proven to prolong a healthy life span. Despite all these scientific advances, it is a fact of our time that medicine continues to grapple with aging and age-related health issues. Therefore, on the one hand, medicine is advancing rapidly in the field of longevity and anti-aging, and on the other hand, it is advancing in providing optimal care to individuals suffering from age-related health problems. This book provides information on the latest advances in longevity, detailing the health challenges and solutions facing today's geriatric population.

Intellectual Property Law and Access to Medicines

Srividhya Ragavan, Amaka Vanni, 2021-07-28 The history of patent harmonization is a story of dynamic actors whose interactions with established structures shaped the patent regime. From the inception of the trade regime to include intellectual property IP rights to the present, this book documents the role of different sets of actors: states, transnational business corporations, or civil society groups and their influence on the structures such as national and international agreements, organizations, and private entities that have caused changes to healthcare and access to medication. Presenting the debates over patents, trade, and the Agreement on Trade Related Aspects of Intellectual Property Rights (TRIPS) Agreement as it galvanized non-state and non-business actors, the book highlights how an alternative framing and understanding of pharmaceutical patent rights emerged as a public issue instead of a trade or IP issue. The book thus offers an important analysis of the legal and political dynamics through which the contest for access to lifesaving medication has been and will continue to be fought. In addition to academics working in the areas of international law development and public health, this book will also be of interest to policy makers, state actors, and others with relevant concerns working in nongovernmental and international organizations.

Digital Management and Artificial Intelligence Richard C. Geibel, 2025 Zusammenfassung This book presents selected contributions from the Fourth International Scientific Practical Conference ISPC 2024 held on October 10-11, 2024, organized by IU International University, East European University, Adelphi University, and the E Commerce Institute, with contributions from Asia, Africa, Europe, and the USA. It discusses the challenges and opportunities of digital transformation and AI in

different industries and introduces advanced research and solutions from both academic and professional perspectives. The topics covered include artificial intelligence, digitalization in healthcare, legal systems, corporate responsibility, e-commerce, digital entrepreneurship, and digital transformation in education. One key topic is social commerce, including live shopping as a blend of social media and e-commerce. The interaction between digitalization and sustainability is also explored. The growing influence of artificial intelligence in the financial sector is examined as well. Additionally, investigations into the impact of digitalization on the education sector and the labor market are included. All studies focus on the unique opportunities presented by digitalization and describe how these new potentials can be translated into concrete benefits. The book is an engaging read for researchers and professionals interested in digital management, one of the most significant developments of recent times.
