tackles these questions along with many others to upend the misunderstandings that plague women's sports. Using historical, contemporary scholarly and popular sources, Schultz traces the progress and pitfalls of women's involvement in sport. In the signature question and answer format of the *What Everyone Needs to Know* series, this short and accessible book clarifies misconceptions that dog women's athletics and offers much needed context and history to illuminate the struggles and inequalities sportswomen continue to face. By exploring issues such as gender, sexuality, sex segregation, the Olympic and Paralympic Games, media coverage and the sport health connection, Schultz shows why women's sports are not just worth watching but worth playing, supporting and fighting for.

**Women in Sports** Adrienne N. Milner, Jomills Henry Braddock

II, 2017-07-28. Covering a breadth of topics surrounding the current state of women in sports, this two volume collection taps current events, sociological and feminist theory and recent research to contextualize women's experiences in sports within a patriarchal society and highlight areas for improvement. Women are continuing to break barriers in all aspects of sports and a growing number of people are beginning to recognize sex disparities in sports as a social problem. Additionally, women's inclusion and exclusion in sports and their equitable and inequitable treatment on the playing field have large scale social, legal, health and economic consequences. *Women in Sports: Breaking Barriers, Facing Obstacles* comprehensively examines the state of women in sports by considering current events, controversies and trends as well as qualitative and quantitative research. The contributors to this volume take a sociological approach to discussing women in sports by questioning dominant assumptions surrounding notions of women's biological, athletic inferiority and by examining other social constructs that affect women's experiences in sports such as race and ethnicity, socioeconomic status and sexual orientation. The book offers a complete and up to date account of women's experiences in sports through coverage of the history of women's participation in sports with a focus on exceptional female athletes and of the increasing number of women who are competing in traditionally male sports such as football, baseball and mixed martial arts. Readers will come away with a greater appreciation for the issues of equity that women face both within the world of sports and in society in general.

**Experiences of Female Athletes Engaged in High School Competitive Sports** Patrice E. Griffin-Codd,2019 Ever since Title IX of the Educational Amendments was passed in 1972 female athletes have had greater opportunities to compete in sports and obtain the same scholarships or other funding as male athletes Since then however the percentage of high school females participating in sports programs has remained around 50% according to statistics from the years 2004 2015 There is some evidence that sports participation by high school female athletes may continue to decline This is a significant problem because research suggests that adolescents who do not participate in sports during high school remain inactive in adulthood With increasing obesity levels seen in children and adults it is imperative that we understand why young high school females do not engage in sports programs The purpose of this study was to understand the experiences of high school girls who are participating in competitive sports during one season The specific aim was to

describe and interpret the lived experiences of girls who participate in one season of the high school competitive sport of cross country running A Heideggerian Hermeneutic approach was used to interpret meaning in the experiences of these competitive athletes in order to develop a better understanding of this phenomenon Two overarching patterns emerged from this analysis The Culture of Running and Approval and Attention From Others These results provide insight into both the challenges and the rewards that adolescent females face when participating in competitive cross country running These results provide ideas on how providers might support female youth athletes with the ultimate goal being to retain their participation in physical activity as well as ground work for further research among this population
