The Game Theorist's Guide to Parenting Paul Raeburn, Kevin Zollman, 2016-04-05 I absolutely loved this book both as a parent and as a nerd Jessica Lahey author of *The Gift of Failure* Delightfully witty refreshingly irreverent and just a bit Machiavellian *The Game Theorist's Guide to Parenting* looks past the fads to offer advice you can put into action today As every parent knows kids are surprisingly clever negotiators But how can we avoid those all too familiar wails of That's not fair and You can't make me In *The Game Theorist's Guide to Parenting* the award winning journalist and father of five Paul Raeburn and the game theorist Kevin Zollman pair up to highlight tactics from the worlds of economics and business that can help parents break the endless cycle of quarrels and ineffective solutions Raeburn and Zollman show that some of the same strategies successfully applied to big business deals and politics such as the Prisoner's Dilemma and the Ultimatum Game can be used to solve such titanic age old parenting problems as dividing up toys keeping the peace on long car rides and sticking to homework routines Raeburn and Zollman open each chapter with a common parenting dilemma Then they show how carefully concocted schemes involving bargains and fair incentives can save the day Through smart case studies of game theory in action Raeburn and Zollman reveal how parents and children devise strategies where those strategies go wrong and what we can do to help raise happy and savvy kids while keeping the rest of the family happy too *Irresistible* Adam Alter, 2018-03-06 *Irresistible* is a fascinating and much needed exploration of one of the most troubling phenomena of modern times Malcolm Gladwell author of *New York Times* bestsellers *David and Goliath* and *Outliers* One of the most mesmerizing and important books I've read in quite some time Alter brilliantly illuminates the new obsessions that are controlling our lives and offers the tools we need to rescue our businesses our families and our sanity Adam Grant *New York Times* bestselling author of *Originals* and *Give and Take* Welcome to the age of behavioral addiction an age in which half of the American population is addicted to at least one behavior We obsess over our emails Instagram likes and Facebook feeds we binge on TV episodes and YouTube videos we work longer hours each year and we spend an average of three hours each day using our smartphones Half of us would rather suffer a broken bone than a broken phone and Millennial kids spend so much time in front of screens that they struggle to interact with real live humans In this revolutionary book Adam Alter a professor of psychology and marketing at NYU tracks the rise of behavioral addiction and explains why so many of today's products are irresistible Though these miraculous products melt the miles that separate people across the globe their extraordinary and sometimes damaging magnetism is no accident The companies that design these products tweak them over time until they become almost impossible to resist By reverse engineering behavioral addiction Alter explains how we can harness addictive products for the good to improve how we communicate with each other spend and save our money and set boundaries between work and play and how we can mitigate their most damaging effects on our well being and the health and happiness of our children Adam Alter's previous book *Drunk Tank Pink* And Other Unexpected Forces that Shape How We Think Feel

and Behave is available in paperback from Penguin *Introduction to Economics* Wendy A. Stock, 2013-03-27 Stock's Social Issues and Economic Thinking presents a realistic picture of current economic thought through an understanding of theory and the application of issues. About the Technology: Designers and design team members need to think about more than just aesthetics. How do you handle short attention spans? How does your design encourage users to engage, browse, or buy? Fortunately, there are psychological principles that you can use in your design to anticipate and benefit from how humans think, behave, and react. About the Book: *Design for the Mind: Seven Psychological Principles of Persuasive Design* teaches you to recognize how websites and applications can benefit from an awareness of our innate natural responses as humans and to apply the same principles to your own designs. This approachable book introduces the psychological principles, deconstructs each into easily digestible concepts, and then shows how you can apply them. The idea is to deepen your understanding of why people react in the ways they do. After reading the book, you'll be ready to make your work more psychologically friendly, engaging, and persuasive. Choice app The next step getting up and running *Consumer Protection and Online Auction Platforms* Christine Riefa, 2016-03-03 Online auctions have undergone many transformations and continue to attract millions of customers worldwide However these popular platforms remain understudied by legal scholars and misunderstood by legislators This book explores the legal classification of online auction sites across a range of countries in Europe Including empirical studies conducted on 28 online auction websites in the UK the research focusses on the protection of consumers economic rights and highlights the shortcomings that the law struggles to control With examinations into important developments including the Consumer Rights Directive and the latest case law from the CJEU on the liability of intermediaries Riefa anticipates changes in the law and points out further changes that are needed to create a safe legal environment for consumers whilst preserving the varied business model adopted by online auction sites The study provides insights into how technical measures as well as a tighter legislative framework or enforcement pattern could provide consumers with better protection in turn reinforcing trust and ultimately benefiting the online auction platforms themselves Time Briton Hadden, Henry R.
