

## Fourth Grade Pacing Guide Weeks 1-9

Week	Unit and Topic	Item Completed
<b>Operations and Algebraic Thinking</b> Use the four operations with whole numbers to solve problems.		
1	Interpret a multiplication equation as a comparison, e.g., interpret $3 \times 5 = 15$ as 3 groups of 5 is 15 times as many as 1 and 1 times as many as 3. Represent whole numbers of multiplication comparisons as multiplication equations.	
2	Apply and extend previous multiplication strategies to calculate products, e.g., use strategies and equations with a symbol for the unknown number to represent the product, strategizing multiplication comparison from earlier experiences.	
3-4	Use addition, subtraction, multiplication, and division to solve problems involving whole number patterns using the four operations, including problems in which one or more quantities are unknown. Represent these problems using equations with a letter standing for the unknown quantity. Monitor the sense of solutions of problems using mental computation and estimation strategies, including rounding.	
<b>Number and Operations in Base Ten</b> Understand place value understanding for multi-digit numbers.		
5-6	Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right. For example, recognize that 700 in 700 is 10 times as much as 70 in 700.	
<b>Number and Operations: Fractions</b> Develop understanding of fraction equivalence and ordering.		
7	Explain why a fraction is equivalent to a fraction, or multiply or divide the numerator and denominator, with attention to how the numerator and denominator both affect how large the fraction is. Represent the fraction on the number line. For this purpose, recognize and generate equivalent fractions.
