2.5 Membrane Permeability

What Can Cross the Membrane?

Types of molecules that cross the membrane:

- Small nonpolar molecules** (like O_2 , CO_2 , and N_2) can diffuse directly through the phospholipid bilayer without any help. These molecules are small and nonpolar.
- Small polar uncharged molecules** (like water, CH_3OH , and $Urea$) can diffuse through the membrane in small amounts. These molecules are small and polar, but they can still pass through the lipid bilayer.
- Large polar molecules and ions** (like glucose, amino acids, Na^+ , and K^+) cannot cross the membrane on their own. They need transport proteins to help them cross. These molecules are large and polar, and they need help to cross the lipid bilayer.

The hydrophobic tails of the phospholipids in the membrane are the main barrier to the passage of most molecules. Small nonpolar molecules can cross the membrane easily, but larger polar molecules and ions need transport proteins to cross.

How Different Molecules Cross the Membrane

Molecule Type	Examples	Can Cross Easily?	Needs Transport Protein?
Small nonpolar	O_2 , CO_2 , N_2	Yes	No
Small polar uncharged	Water, CH_3OH , $Urea$	Yes (in small amounts)	No
Large polar	Glucose, amino acids	No	Yes
Ions	Na^+ , K^+ , Cl^-	No	Yes

1.5 Representing a Quantitative Variable with Graphs

Remember that a **quantitative variable** (or **quantitative variable**) refers to variables that can be measured and analyzed with statistical methods. Quantitative variables can be further categorized into discrete and continuous variables.

- Discrete variables** can take on a limited number of values. The number of children in a family is a discrete variable. Examples of discrete variables include the number of children in a family, the number of cars in a parking lot, and the number of votes received by a political candidate.
- Continuous variables** can take on an infinite number of values, but these values cannot be measured exactly. Examples of continuous variables include the height of a person, the weight of a person, and the time it takes to run a mile. Continuous variables are measured on a scale that has no gaps between values.

This page will describe how to represent and display quantitative data. The following table is a summary of the key concepts you need to know for this topic. The goal is to help you understand the key concepts and how to represent them with graphs. The table is divided into two main sections: discrete variables and continuous variables. Each section has a list of key concepts and a description of how to represent them with graphs.

2.12 Legacies of the Haitian Revolution

The Haitian Revolution represented a major turning point in the history of the Americas. The successful uprising of enslaved African Americans and the creation of the first Black republic in the world had a profound impact on the Americas and the world. The revolution inspired other enslaved people to rise up and demand freedom. It also challenged the idea of white supremacy and the idea of a racial hierarchy. The revolution was a major step towards the end of slavery and the establishment of a more just and equal society.

3.5 The American Revolution

Causes of the American Revolution

In response to the British, the American people began their struggle for independence, including:

- Protest against British taxation without representation in the British government.
- Other measures to resist and challenge the British colonial authorities and policies.
- Declaration of the colonies as a separate nation in 1776.
- The fighting of the Revolutionary War from 1775 to 1781.
- The signing of the Treaty of Paris in 1783, which recognized the colonies as a new nation.
- The establishment of the new nation's government and constitution.
- The growth of a sense of national identity and unity among the colonists.

The Boston Massacre

The Boston Massacre was a deadly incident that took place in the American Revolution. It was the first time that British soldiers had killed American civilians. The incident was a major turning point in the revolution and led to the signing of the Declaration of Independence.

A group of British soldiers were standing on the Boston Common, guarding the customs house. A group of American citizens were gathered in the area, and the soldiers fired on them.

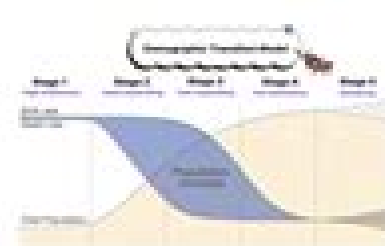

The soldiers were ordered to fire on the crowd, and they did so. Five people were killed, and many others were injured. The incident was a major turning point in the revolution and led to the signing of the Declaration of Independence.

2.5 The Demographic Transition Model

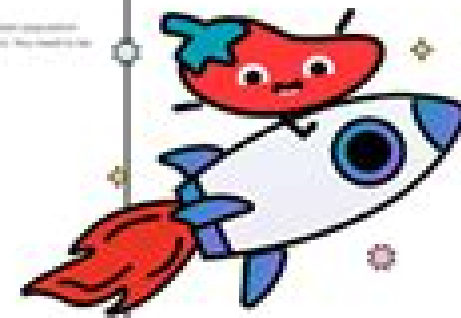

Demographic Transition Model

Remember: The **Demographic Transition Model** (DTM) is a model that describes the changes in population growth and development over time. It is based on the idea that population growth is driven by changes in birth and death rates. The DTM is divided into four stages: Stage 1 (High birth and death rates), Stage 2 (Declining death rates), Stage 3 (Declining birth rates), and Stage 4 (Low birth and death rates).

Stage 1

Stage 1 is the **High birth rate and high death rate** stage. Because of this, the natural increase rate is close to zero. **Population growth** is slow. The birth rate and death rate are both high, and the population remains the same. The birth rate and death rate are both high, and the population remains the same.
