Top managers in diverse organizations have an understanding and appreciation by the staff community. Instead of being an "out-group" entity, top managers become "in-group" members, and this is critical to creating lasting top managers who are valued and respected by the staff community. This is the key to creating a lasting and successful organization.

The intensity of the language about the community, though, that was often racist and unbecomingly negative, was a stark contrast to the thoughtful and caring tone of the writing. Another reviewer suggests that the book reads like a collection of thoughtful, generally positive reviews on a range of three cities (Lagos, Addis and Kampala) with little overarching analysis of the continent as a whole or of the role of the book's authors. It is a pity that the book's approach was not more reflective and critical.

Simplified Signs: A Manual Sign-Communication System for Special Populations, Volume 1. John D.

Bonvillian, Nicole Kissane Lee, Tracy T. Dooley, Filip T. Loncke, 2020-07-30 Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages. It is the culmination of over twenty years of research and development by the authors. The Simplified Sign System has been developed and tested for ease of sign comprehension, memorization, and formation by limiting the complexity of the motor skills required to form each sign and by ensuring that each sign visually resembles the meaning it conveys. Volume 1 outlines the research underpinning and informing the project and places the Simplified Sign System in a wider context of sign usage historically and by different populations. Volume 2 presents the lexicon of signs totalling approximately 1000 signs each with a clear illustration and a written description of how the sign is formed as well as a memory aid that connects the sign visually to the meaning that it conveys. While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities, cerebral palsy, autism, or aphasia, it may also assist the communication needs of a wider audience such as healthcare professionals, aid workers, military personnel, travellers, or parents and children who have not yet mastered spoken language. The system also has been shown to enhance learning for individuals studying a foreign language. Lucid and comprehensive, this work constitutes a valuable resource that will enhance the communicative interactions of many different people and will be of great interest to researchers and educators alike. *Clinical Signs in Neurology* William W.
