

THE BACKYARD ASTRONOMER'S GUIDE

The background of the book cover is a composite image. The upper portion shows a deep blue night sky filled with numerous stars. A bright, curved comet with a visible tail is positioned in the upper right quadrant. The lower portion of the cover depicts a dark, rugged landscape, possibly a desert or a rocky terrain, under a twilight sky. A horizontal band of orange and yellow light, resembling a sunset or sunrise, stretches across the middle of the image, separating the dark foreground from the starry sky above.

The Backyard Astronomer's Guide Terence Dickinson, Alan Dyer, 1991 All astronomical photographs by amateur astronomers **The Backyard Astronomer's Field Guide** David Dickinson, 2020-07-21 Discover Beautiful Nebulas Constellations Deep Sky Objects and More with Your Telescope David Dickinson co author of The Universe Today Ultimate Guide to Viewing the Cosmos has created the ultimate field guide for backyard astronomers Whether you want to impress viewers at a star party or learn what you can see with your new telescope David shows you how to find the most impressive views the night sky has to offer Broken down by month and by hemisphere to ensure you get the best possible view David shows you how to find objects like spiral galaxies stunning sights in the Milky Way and stars that bring the wow factor to astronomy With 44 sky charts and David's expertise it's like having a pro astronomer out in the field with you *Advanced Skywatching* Robert Burnham, 1997 Astronomy observers manual **A Guide to Backyard Astronomy** Robert Burnham, Alan Dyer, Robert A. Garfinkle, Martin George, Jeff Kanipe, David H. Levy, 2003 **A Guide to Advanced Skywatching**, 2002 *Summer Stargazing* Terence Dickinson, 1996 An abundantly illustrated guide to the year's best stargazing season Summer brings with it fine stargazing weather it also happens to be the time of the year when our galaxy the Milky Way arches high across the sky Terence Dickinson The cool clear nights from May to October offer astronomers the best opportunities for stargazing Few sights in nature can compare with the splendor of a dazzling star filled sky Summer Stargazing captures the grandeur of the universe with down to earth simplicity All that is needed is a reasonably dark night sky a pair of binoculars or a simple telescope and this book The book features everything else the amateur astronomer needs including easy to use color star charts that cover the entire North American sky for one year and photographic quality charts for this main stargazing season With Summer Stargazing astronomers can delve into the majesty of the starry night to explore Planets of the Solar System Galaxies Remote star forming nebulae Glittering star clusters and more Helpful advice is given for safely viewing special phenomena such as eclipses and auroras Summer Stargazing is both a stargazing guide and a pictorial celebration of the summer night sky **Astronomy for Older Eyes** James L. Chen, 2017-03-15 This book is for the aging amateur astronomy population including newcomers to astronomy in their retirement and hobbyists who loved peering through a telescope as a child Whether a novice or an experienced observer the practice of astronomy differs over the years This guide will extend the enjoyment of astronomy well into the Golden Years by addressing topics such as eye and overall health issues recommendations on telescope equipment and astronomy related social activities especially suited for seniors Many Baby Boomers reaching retirement age are seeking new activities and amateur astronomy is a perfect fit as a leisure time activity Established backyard astronomers who began their love of astronomy in their youth meanwhile may face many physical and mental challenges in continuing their lifelong hobby as they age beyond their 55th birthdays That perfect telescope purchased when they were thirty years old now suddenly at sixty years old feels like an immovable object in the

living room The 20/20 eyesight has given way to reading glasses or bifocals Treasured eyepieces feel all wrong Growing old is a natural process of life but astronomy is timeless With a little knowledge and some lifestyle adjustments older astronomers can still enjoy backyard observing well into their seventies eighties and even into their nineties The Backyard Astronomer Dennis Mammana, 1996 An introduction to the basics of stargazing with explanations of celestial phenomena such as solar eclipses lunar phases comets and meteors Includes star charts and maps safety tips and techniques for observing the sun moon planets stars and deep sky objects and how to select and use equipment such as binoculars telescopes and filters **The Ultimate Backyard Astronomer's Guide for Beginners** Kevin A. Powell, 2021-01-31 Have you ever gazed up at the night sky been wondered by what you see and thought about taking a closer look If this is you then I can tell you that you are not alone Amateur Astronomy has taken off in the past two decades with the bounty of well priced competent high quality equipment available today But for the complete beginner with no experience the one question that will be particularly obvious is What do I need to get great views of the heavens The first awakening many people have to Astronomical equipment is when they visit their local store and find cheap telescopes offered in brightly colored boxes claiming 500X magnification and designating impressively detailed color pictures of planets and galaxies Don't be deceived by this This is NOT the fulfillment you'll get and it's clearly NOT what you'll see particularly with the telescope in this box from this store This is so tricky and has been accountable for more setbacks to wannabe astronomers than any other particular thing I'd advise these are just toys and you should stay far away from them And regrettably even with equipment costing many times more you still won't see the detail and color described on these types of boxes Firstly when you look into even a modest telescope you won't see color The minuscule amount of light emanating from heavenly objects is not enough to display as color usually on our retinas That said it is probable to see some basic color detail on planets and galaxies that are large and close enough to provide adequate light output I can say without exception when I have introduced family and friends to their first ever view of Saturn in all its glory the reaction is always a wide eyed gasp and a wow Likewise Jupiter's four clearly visible Galilean Moons move in real time if you watch for several minutes Naturally the objects you're seeing are moving the whole time you're looking at them Honestly to see these heavenly objects this close and personal as you've never seen them before gives you a beautifully strange yet eerie feeling of being just a tiny speck in a universe far more extensive than you've probably ever thought before To see things in your eye piece that are so far away that they may have ceased to exist millions of years ago appears incomprehensible in a naive sense It's so tough to imagine the light from that dim and distant object that would have taken millions upon millions of years to reach your eye If you're interested enough that this has sharpened your appetite for more then take a note of the following step by step guide before racing out and purchasing equipment that may not suit your demands In the book The ultimate Astronomer's guide for Beginners you will learn the Step by step guide to finding the best objects the night has to offer choosing your telescope Building a Backyard Observatory and

right outside your door **Compendium of Practical Astronomy** Günter D. Roth, 2012-12-06 It is a pleasure to present this work which has been well received in German speaking countries through four editions to the English speaking reader We feel that this is a unique publication in that it contains valuable material that cannot easily if at all be found elsewhere We are grateful to the authors for reading through the English version of the text and for responding promptly for the most part to our queries Several authors have supplied us on their own initiative or at our suggestion with revised and updated manuscripts and with supplementary English references We have striven to achieve a translation of Handbuch for Sternfreunde which accurately presents the qualitative and quantitative scientific principles contained within each chapter while maintaining the flavor of the original German text Where appropriate we have inserted footnotes to clarify material which may have a different meaning and or application in English speaking countries from that in Germany When the first English edition of this work Astronomy A Handbook translated by the late A Beer appeared in 1975 it contained 21 chapters This new edition is over twice the length and contains 28 authored chapters in three volumes At Springer's request we have devised a new title Compendium of Practical Astronomy to more accurately reflect the broad spectrum of topics and the vast body of information contained within these pages *Backyard Astronomy* Fog City Press, Robert Burnham, 2003 Colorful illustrations enhance this introduction to astronomical observations **NightWatch** Terence Dickinson, Ken Hewitt-White, 2023-09-07 As NightWatch Terence Dickinson's classic stargazing guide neared its 40th anniversary Dickinson worked with a small group of trusted colleagues to give this groundbreaking reference an overhaul that will take it deep into the 21st century Longtime astronomy writer and sky observer Ken Hewitt White led the editorial team A central aspect to this new edition is the subtle improvements to the unique seasonal star charts that present a 360 degree simulation of the night sky on one page and identify the stars and constellations on the facing page Yet it is Dickinson's clear jargon free language that will continue to inspire hundreds of thousands of people around the world to take up recreational astronomy Much has happened in this popular hobby since the revised Fourth Edition of NightWatch was published in 2006 In response the text has been substantially revised and updated throughout all 13 chapters Moreover the book has been completely redesigned and most of its many photographs have been replaced A noted feature is the variety of superb astrophotos of star clusters nebulae galaxies and other celestial phenomena taken by accomplished amateur astronomers Lavishly illustrated sections on the Moon and planets will inspire novice observers of the solar system To accommodate the extensive revisions NightWatch has grown from 192 pages to 208 pages With the release of the Fifth Edition we are also launching a new website NightWatchBook.com that will offer links to additional resources and will be regularly updated with information on new celestial events and equipment Since the First Edition of NightWatch was released in 1983 the most significant transformations in amateur astronomy have been in optics and technology For all the latest on gadgets and gear renowned astrophotographer Alan Dyer Dickinson's coauthor of *The Backyard Astronomer's Guide* has contributed an entirely new

chapter on basic digital astrophotography Dyer has also modernized a key portion of an enlarged chapter on stargazing equipment creating a welcoming place in NightWatch for today's computerized telescopes Stargazing enthusiasts of all levels of experience will discover much of value in an enduring reference conceived by one of the most respected names in amateur astronomy This must have Fifth Edition includes a comprehensive all season guide to the night sky constellation charts covering both northern and southern hemisphere skies making NightWatch a truly global resource tips on choosing binoculars and telescopes and taking astrophotos highlights of major features on the Moon to guide the budding lunar explorer lists of solar and lunar eclipses planet locations and the best lunar and planetary conjunctions to 2035 a range of resources for further study

Through the Telescope: A Guide for the Amateur Astronomer, Revised Edition Patricia Barnes-Svarney, Michael Porcellino, 2000 In the ten years since this award winning book was originally written by Michael Porcellino the field of astronomy and its discoveries has grown by leaps and bounds From the astounding images sent back by the Hubble Space Telescope to the bright comet Hale Bopp from the fleet of Martian probes to the long distance explorations of the Moon Jupiter Venus and Saturn the universe has become more accessible than ever And thanks to this revised and thoroughly updated new edition by astronomer and science writer Patricia Barnes Svarney anyone with an interest can delve into its wonders From the very close up to the far reaches of space THROUGH THE TELESCOPE presents a uniquely user friendly view of the universe and offers both novice and advanced amateur astronomers some of the best tools available to watch the nighttime skies You'll learn all about Setting up a good user friendly telescope system How to look at the universe in order to really see it Upgrading your telescope for peak performance How to spot a star cluster a nebula even a supernova Forming your own network of amateur astronomers Complete with a web site appendix and fully updated charts on eclipses and planetary oppositions well into the year 2000 this edition of an acclaimed book will be an invaluable users guide for aspiring astronomers entering the new millennium
