The Belief Book:

The Belief Book David G. McAfee, 2015 What is belief and why is it so important Where did it come from and what does it do This book answers all of those questions and more David G McAfee an author who studies religions teamed up with writer and illustrator Chuck Harrison to create The Belief Book No matter how old or how young you are this easy to read book can help you learn more about religions and gods and beliefs in general It will also teach you about something called The Scientific Method which is how we learn new things about the world By the time you re done reading you will know the answers to some of life s biggest questions but more importantly you will see why your questions and all questions for that matter are so important This book is the first in a series of books all about belief gods and religion The fully illustrated and interactive Belief Book is for readers and thinkers of all ages including kids and kids at heart *The Believing Brain* Michael Shermer, 2012-06-07 Synthesizing thirty years of research psychologist and science historian Michael Shermer upends the traditional thinking about how humans form beliefs about the world Simply put beliefs come first and explanations for beliefs follow The brain Shermer argues is a belief engine Using sensory data that flow in through the senses the brain naturally looks for and finds patterns and then infuses those patterns with meaning forming beliefs Once beliefs are formed our brains subconsciously seek out confirmatory evidence in support of those beliefs which accelerates the process of reinforcing them and round and round the process goes in a positive feedback loop In *The Believing Brain* Shermer provides countless real world examples of how this process operates from politics economics and religion to conspiracy theories the supernatural and the paranormal Ultimately he demonstrates why science is the best tool ever devised to determine whether or not our belief matches reality **The Corpses of Times Generations** RICHARD J. KOSCIEJEW, 2014-01-09 Anyone who has ever tried to present a rather abstract scientific subject in a popular manner knows the great difficulties of such an attempt Either he succeeds in being intelligible by concealing the core of the problem and by offering to the reader only superficial aspects or vague allusions thus of deluding the reader by arousing in him the deceptive illusion of comprehension Or else he gives an expert account of the problem but as the untrained reader is unable to follow the exposition and becomes discouraged from reading any further If these two categories are omitted from todays popular scientific literature surprisingly little remains But the little left is very valuable indeed It is very important that the public is given an opportunity to experience consciously and intelligently the efforts and results of scientific research It is not sufficient that each successive progression is taken up elaborated and applied by a few specialists in the field Restricting the body of knowledge to a small group deadens the philosophical spirit of these people and leads to spiritual poverty THE CORPSES OF TIMES GENERATIONS represents a valuable contribution to popular scientific writing The main ideas to Theory are extremely well presented Moreover the presents state of our knowledge in which the paradigms of science are aptly characterized Mr Kosciejew shows how the criterial growth of our factual knowledge with the striving for a unified conception comprising all empirical data has led to

the present situation which is characterized despite all successes by an uncertainty concerning the choice of the basic theoretical concept

The Belief System Nut James Bruce, 2014-12-07 A belief system is like the nut inside of a walnut. The protective shell of the walnut is like the several influences that affect and guard one's beliefs. This self-examination book is guaranteed to inform the active participant of how their beliefs are created and sustained. They will be amazed as their belief system nut begins to open. They will enjoy the experience of discovering themselves as they critique and rethink their belief systems' flaws. Do I what I believe? Do I believe what I know? And Why do I believe what I believe? What does that say about me? And where will my beliefs take me?

The Images of Time Robin Le Poidevin, 2007-09-27 The Images of Time presents a philosophical investigation of the nature of time and the mind's ways of representing it. Robin Le Poidevin examines how we perceive time and change the means by which memory links us with the past, the attempt to represent change and movement in art, and the nature of fictional time. These apparently disparate questions all concern the ways in which we represent aspects of time in thought, experience, art, and fiction. They also raise fundamental problems for our philosophical understanding both of mental representation and of the nature of time itself. Le Poidevin brings together issues in philosophy, psychology, aesthetics, and literary theory in examining the mechanisms underlying our representation of time in various media and brings these to bear on metaphysical debates over the real nature of time. These debates concern which aspects of time are genuinely part of time's intrinsic nature and which in some sense are mind-dependent. Arguably the most important debate concerns time's passage: does time pass in reality or is the division of events into past, present, and future simply a reflection of our temporal perspective, a result of the interaction between a static world and minds capable of representing it? Le Poidevin argues that contrary to what perception and memory lead us to suppose, time does not really pass, and this surprising conclusion can be reconciled with the characteristic features of temporal experience.

Belief James E. Alcock, 2018 This book explores the psychology of belief: how beliefs are formed, how they are influenced both by internal factors as well as external factors.

Belief Magic Paul W. Marko, Ph.D., 2014-02-20 Marko exposes the truth about the mental processes and outside forces that cement you firmly into what he refers to as your belief wardrobe. The book is crammed with fascinating information designed to trigger breakthroughs in understanding the how's and the whys of your currently held beliefs. Some of which may not be in your best interest and may indeed render you more subject to control and manipulation by advertisers, governments, or other interested parties. The insights spotlighted in this colorful but practical exposé include a process that he describes as intentional belief acquisition and management as opposed to beliefs superimposed by media schooling or the TV hive mind. You may be surprised to learn the criteria that your ego uses to select your beliefs and how much effort is expended by outside forces to render your beliefs compatible with their aims. Also as a side benefit, understanding how the ego within everybody determines beliefs often helps in developing an appreciation of

those around you that may have limiting beliefs and possible ways to aid them in realizing the circular nature of their predicament where beliefs select data to reinforce their chosen truth In an unusually clear and instructive fashion the author provides breakthrough information and techniques intended to successfully lead to the development of an expanded worldview One from which you can remake your reality to one where miracles are able to be seen all around you and magic can move from the realm of scientific anomaly to a lived experience with infinite possibilities This new Science of Liberation may just be the element that puts humanity back on the path to conscious heaven

Contemporary Debates in Philosophy of Religion Michael L. Peterson, Raymond J. VanArragon, 2020-01-15 Lively debates on controversial and compelling questions in the philosophy of religion an updated edition of the bestselling title Building upon the reputation of the first edition the extensively revised second edition of Contemporary Debates in Philosophy of Religion features fifteen essays which present arguments on some of the most central and controversial topics in philosophy of religion from the discipline's most influential thinkers Considering questions of both emerging and perennial interest from atheistic theistic and agnostic viewpoints the book adopts the series structure which pairs essays espousing opposing perspectives on a particular question or theme in an engaging pro and con format Following accessible introductions to each debate the volume's new and newly revised contributions set the stage for thoughtful and lively discourse between philosophers in philosophy of religion and analytic theology Debates range from vigorous disagreements between theists and their critics to arguments between theists of different philosophical and theological persuasions highlighting points of contrast for readers while showcasing the field's leading minds in dialogue The head to head chapters offer forceful advocacy for some of the most compelling ideas beliefs and objections in the philosophy of religion opening the conversation up to students to weigh the arguments and engage in comparative analysis of the concepts for themselves Written to appeal to the non specialist as well as the professional philosopher Contemporary Debates in Philosophy of Religion is ideal as both a provocative primary text for coursework in analytical theology and philosophy of religion and as a broad survey of the field for scholars and general readers with an interest in the questions which underpin contemporary philosophy of religion and theology

The Recipient of Thought Richard John Koscijew, 2019-10-11 The history of science reveals that scientific knowledge and method did not spring from a fully bloomed blossom for which the minds of the ancient Greeks did any more than language and culture emerged fully formed in the minds of The Homo sapiens sapient Scientific knowledge is an extension of ordinary language into greater levels of abstraction and precision through reliance upon geometric and numerical relationships We speculate that the seeds of the scientific imagination were planted in ancient Greece as opposed to Chinese or Babylonian culture partly because the social political and an economic climate in Greece was more open to the pursuit of knowledge with marginal cultural utility Another important factor was that the special character of Homeric religion allowed the Greeks to invent a conceptual framework that would prove useful in future scientific investigation
