## True Prosperity Success Without Side Effects:

*Making Jeans Green* Paulina Szmydke-Cacciapalle, 2018-05-20 Consumers spend approximately 93 billion on denim products every year. This consumption comes at a great cost with thousands of litres of fresh water, hazardous chemicals and energy contributing to just one pair of jeans leaving the environment and the industry vulnerable to pollution and climate change. Using facts, figures, case studies and anecdotes, this book investigates why the industry has been so slow to adopt green technologies and offers practical solutions to designers and fashion executives who want to switch to cleaner manufacturing including those working in the fast fashion sector. It also offers advice to the eco-conscious consumer who wants to purchase denim more sustainably. Considering the full lifecycle of a pair of jeans from the cotton crop to disposal, it presents examples of how to go green at different stages. This book will be of great interest to fashion students and researchers as well as designers, fashion executives, policy makers and anyone who comes into contact with the world of denim.
