Instructional Design for Organizational Justice Lisa A. Giacomo, Steven W. Villachica, Donald A. Stepich, 2024-07-24. Instructional Design for Organizational Justice prepares instructional designers to use culturally relevant performance based learning materials and environments that improve organizational and workplace learning experiences for today's diverse, globalized contexts. With socially just leadership and DEI initiatives growing in institutions across sectors, today's instructional design programs must prepare graduate students to be more culturally relevant, equity minded, and inclusive in their professional practice. This textbook explores the implementation of systematic, systemic, and performance oriented designs alongside the use of organizational justice theory to facilitate more equitable, inclusive performance improvement and workplace learning interventions. The book introduces the Learning and Performance Support Instructional Design LeaPs ID Model. Applicable to instructional designers, educational technologists, learning experience designers, learning engineers, and human resource development professionals, this original iterative process integrates common ID heuristics, design based thinking, culture, equity, inclusion, and other inputs external to the organization and ID project. It portrays a realistic, scalable, iterative, agile approach to the ID process, aids in the design of environments in which adult learners can observe practice and receive feedback, building the knowledge and capacity required for their desired performance, and is illustrated by a wealth of examples, templates, and processes developed in the field to support adult learners and collaborate with subject matter experts. Relevant to business, government, military, non profit, non governmental, and higher education settings, this unique and comprehensive volume lends itself to uncovering values and motives essential

to successful agile project management as well as to diversity equity and inclusion initiatives and social change Critical Perspectives on Work-Integrated Learning in Higher Education Institutions Nirmala Dorasamy, Renitha

Rampersad, 2018-11-30 Governments around the world are committed to enhancing students' graduation. Work integrated learning (WIL) is one of the many programmes which Higher Education Institutions (HEIs) can develop to promote this facet of student life. The incorporation of work integrated learning in curriculum design and development can produce reciprocal benefits for students, workplaces, professions and communities. Any curriculum design and development endeavour relating to WIL requires appropriate resources to support curriculum development. This book serves to explore WIL programmes and experiences for the student WIL coordinator and supervisor. It further integrates practical, relevant and reflective industry experience within the higher education curriculum to enhance student development. WIL has no uniformly or specific framework or approaches since it is an emerging field and is generally influenced by contextual factors. In view of the diversity in theory and practice and different purposes whether pragmatic or practical driving the adoption of one approach over another, this book highlights the diverse approaches that encapsulate WIL in South Africa.
