Skills Formation for Economic Growth David Lim, 2025-03-31 This book explores the vocational education programmes of Hong Kong programmes that are repeatedly noted for their excellence The book traces the founding and development of the Vocational Training Council of Hong Kong which was set up in 1982 to offer sub degree programmes in vocational and professional education and training It shows how it transformed itself from an institution seen by industry government and the public alike as not meeting the needs of Hong Kong to one that has spearheaded the development of this form of education in Hong Kong including offering degree programmes in these areas through its Technological and Higher Education Institute Written by a leading scholar of vocational education with extensive experience of devising and implementing vocational education programmes it offers this as a valuable resource to students and scholars of education particularly in an Asian context as well as of vocational and

professional education and training A University Education David Willetts, 2017-11-17 Universities have a crucial role in the modern world In England entrance to universities is by nation wide competition which means English universities have an exceptional influence on schools a striking theme of the book This important book first investigates the university as an institution and then tracks the individual on their journey to and through university In A University Education David Willetts presents a compelling case for the ongoing importance of the university both as one of the great institutions of modern society and as a transformational experience for the individual The book also makes illuminating comparisons with higher education in other countries especially the US and Germany Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014 the author offers a powerful account of the value of higher education and the case for more expansion He covers controversial issues in which he was involved from access for disadvantaged students to the introduction of 9 000 fees The final section addresses some of the big questions for the future such as the the relationship between universities and business especially in promoting innovation He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly This is an authoritative account of English universities setting them for the first time in their new legal and regulatory framework Higher Education and the Common Good Simon Marginson, 2016-12-19 In the last half century higher education has moved from the fringe to the centre of society and accumulated a long list of functions In the English speaking world Europe and much of East Asia more than two thirds of all school students enter tertiary education Bulging at the seams universities are meant to be fountains of new knowledge engines of prosperity and innovation drivers of regional growth skilled migration and global competitiveness and makers of equality of opportunity Yet universities cannot drive prosperity on their own and they can do little to stop rising income inequality which is shaped by taxation policy and income determination in the workplace Worse the growing emphasis on the private benefits of higher education without regard for its public benefits has positioned the higher education sector as elite forming as a maker of social inequality rather than a corrective to it In the English speaking countries in which government sees itself as servant of high capitalism official policy models higher education as a market and has narrowed its purpose to the enhancement of individual earnings and employability partly to justify the ever rising tuition fees Higher education systems have become intensely competitive and increasingly stratified with value concentrated at the top In this quasi aristocratic economics of education mass institutions are losing social value and the collective public benefits of universities are unmonitored underfunded and ignored In short governments expect both too much and too little of higher education and its contribution to the common good is being eroded Yet this sector can play a key role in rebuilding social solidarity and mobility in fractured societies **Saturday Review of Literature** ,1926 *School & University Review* ,1976 **The Biograph and review** ,1879 **U.S. News & World Report** ,2008 Management Review ,1930
