sometimes chains to transmit the forces of the flight deck controls to the control surfaces

Chapter 6 Aircraft Systems This chapter covers the primary systems found on most aircraft. These include the engine propeller induction ignition as well as the fuel lubrication cooling electrical landing gear and environmental control systems.

Be it a local flight or a long cross country flight decisions based on weather can dramatically affect the safety of the flight.

Chapter 12 Aviation Weather Services In aviation weather service is a combined effort of the National Weather Service NWS Federal Aviation Administration FAA Department of Defense DOD other aviation groups and individuals. While weather forecasts are not 100 percent accurate meteorologists through careful scientific study and computer modeling have the ability to predict weather patterns trends and characteristics with increasing accuracy. These reports and forecasts enable pilots to make informed decisions regarding weather and flight safety before and during a flight.
