Competing with Disruptive Business Models in Traditional Industries. Conceptualisation of a Strategic Framework

Nils Berkemeyer, 2016-05-06 Master's Thesis from the year 2015 in the subject Business economics Business Management Corporate Governance grade 1.0 Cass Business School language English abstract An increasing number of journalistic articles and academic literature deal with the struggle of established companies to fend off the attacks by industry newcomers such as Airbnb Spotify Netflix Google and many others. These companies enter traditional industries with innovative business models and compete in a manner which makes it challenging for incumbent firms to understand their novel competition and respond effectively. This study introduces a typology of three stages of industry disruption that classify the newcomer's developmental stage and describe the incumbent's competitive position in terms of competition intensity and remaining time to respond. It is demonstrated how incumbents may conduct their strategic reasoning along these stages to arrive at a strategic goal and evaluate possible counter measures

How do Fintech Startups and a Changing Consumer Behavior Reshape the Financial Services Industry?

Viktor Kanzler, 2015-05-18 Bachelor Thesis from the year 2015 in the subject Business economics Business Management Corporate Governance grade 1.3 Frankfurt School of Finance Management language English abstract The purpose of this study is to illustrate how Fintech startups and other non financial institutions reshape the finance industry as they take advantage of recent technology trends and lifestyle shifts affecting customers expectations. The thesis aims to show how the competitive landscape changes and to what extent digital attackers grab parts of the value chain. The study also maps out the Fintech landscape highlights important growth trends and gives an

overview of the services and products with which Fintech startups are currently edging into the market. Moreover the study points out the specific drivers and barriers relevant to Fintech companies. A further objective was to find out whether Fintech startups pose a serious threat to traditional providers and if so which generic approaches exist to deal with these attackers. Apart from that the aim was to identify how peers address digitization as well as what strengths traditional banks can rely on. Last but not least the study demonstrates what banks and other institutions can learn from Fintech startups and how the future of finance could develop and look like in 2020.

Terms of Service Jacob Silverman, 2015-03-17 Social networking has grown into a

staple of modern society but its continued evolution is becoming increasingly detrimental to our lives. Shifts in communication and privacy are affecting us more than we realize or understand. Terms of Service crystalizes this current moment in technology and contemplates its implications the identity validating pleasures and perils of online visibility our newly adopted view of daily life through the lens of what is share worthy and the surveillance state operated by social media platforms Facebook Google Twitter and others to mine our personal data for advertising revenue an invasion of our lives that is as pervasive as government spying Jacob Silverman calls for social media users to take back ownership of their digital selves from the Silicon Valley corporations who claim to know what's best for them. Integrating politics sociology national security pop culture and technology he reveals the surprising conformity at the heart of Internet culture explaining how social media companies engineer their products to encourage shallow engagement and discourage dissent. Reflecting on the collapsed barriers between our private and public lives Silverman brings into focus the inner conflict we feel when deciding what to share and what to like and explains how we can take the steps we need to free ourselves from its grip [OECD Internet Economy Outlook](#) ,2012

Big or Smart Data? Recent trends in Data Science for sales and marketing Julia Ertel,2022-05-09 Bachelor Thesis from the year 2021 in the subject Business economics Miscellaneous grade 1 0 Pforzheim University language English abstract Big data is getting larger the pressure in the market to use the existing data is getting stronger and therefore also the number of companies that address the topic of data science increases This dissertation focuses on identifying big or smart data science trends in marketing and sales within the consumer packaged goods industry The objective of this research is to address actual opportunities around data science for the selected focus area The following research project analyzes those opportunities and identifies nine data science trends Via in depth interviews the expert's experiences and difficulties with data science are questioned emotions that arise through the interaction with this science are recognized and potentials for improvements are discussed Subsequently central meaningful quotations are analyzed with Mayring's qualitative content analysis reformulated into condensed codes and summarized through eighteen overarching categories The general findings of this analysis include the necessity of smart data insights within this low margin industry the dependence on consultancy support due to knowledge gaps expandable engagement in the B2B environment the promotion of data thinking and acting the merge of sales and marketing for data science knowledge generations and the extension of data science knowledge to maintain competitive advantage within the market for the long run The improvement proposals consist mainly of automated data cleaning intelligent algorithms data handling knowledge development data democracy and knowledge combinations in form of project dependent focus teams to broaden data science applications within the industry **Adoption of Smart Home Speakers** Jakob Summer,2023-04-05 Master's Thesis from the year 2021 in the subject Business economics General grade 1 00 Management Center Innsbruck Management Center Innsbruck language English abstract Due to technological progress smart speakers have entered the market in recent years and have

already been adopted by certain parts of the population. Although several studies have tried to explain the crucial factors for smart speaker adoption there is still no common understanding and there are significant gaps in the literature analysing the adoption of smart speakers at their current technical level in specific countries. Therefore this study aims to identify factors influencing the intention to use smart speakers in Germany. By reviewing the literature on innovation acceptance with an emphasis upon adoption studies of voice controlled technologies the research model of this thesis was developed. The hypothesized effects of the twelve constructs in the model were tested using an online survey with questionnaires as data collection instruments among 233 German non adopters. The study found that certain constructs specifically enjoyment, privacy concerns, usefulness and social influence were significant predictors of intention to use. System quality and smart speaker complementarity with apps and services additionally emerged as predictors of perceived usefulness. Results suggest that companies should pay particular attention to these factors when marketing and further developing smart speakers. The factors identified might further influence the acceptance of similar IT products.

Vanity Fair, 2012 **Bloomberg Businessweek**, 2010-04 *Transformation of conventional Banking. Opportunities and risks of Fintech companies in Asset Management* Gleb Romanchuk, 2019-05-03. Master's Thesis from the year 2019 in the subject Business economics Banking Stock Exchanges Insurance Accounting grade 1.3 Berlin School of Economics and Law language English abstract. The purpose of this work was to find out whether Fintechs are able to compete with Banks in the field of Asset Management. Companies providing Robo Advisory services are considered to be the banks of the future. Several interviews with companies working in this field have been conducted to investigate if the algorithms are prepared for the next financial crash. This work contains 7 chapters starting with the motivation and research question. Secondly, the general situation on the market will be described including the changes of customer behavior. This serves the purpose to give an understanding about the current market conditions. Thirdly, the banking sector will be described considering definitions and regulations. In this work the focus will be on the German market, therefore consumer

behavior and details about the German retail banking industry are relevant. Subsequently chapter 4 deals with asset management and the new trends in the industry. Chapter 5 describes the development of the fintech industry. Definitions and regulations of the fintech companies are part of this chapter. In chapter 6 the scientific investigation will be conducted and presented. The results will show how stable the new technologies are in order to give an outlook for the future in the next chapter. Prospects for the future of retail banking and especially asset management will be mentioned in chapter 7. General current trends and forecasts are also part of this chapter. Since only limited literature is available about the fintech industry and especially robo advisory the investigation part includes a qualitative approach with interviews that have been conducted with qualified specialists that work or research in the robo advisory industry. The question of whether and how the robo advisors will survive the next financial crisis is topic of the interviews. There has been no financial crisis that might have caused unforeseen problems for the systems ever since the creation of robo advisory. Thus it is unknown how those technologies will react to chaotic market situations. The idea was to ask companies to what extent they are prepared for a financial crisis. The findings of this investigation will deal with the possible future outline of those fintechs providing algorithm based asset management. The question about the security framework has been answered with a view to examining the future development of the robo advisory industry.
