Paypal In The Us:

Digital Innovation in Financial Services Phoebus L. Athanassiou, 2016-04-24 Consumer behaviour is rapidly trending towards the use of digital devices as instruments through which to transact day to day business. This original and timely book shows how this trend creates new opportunities not only for retail consumers but also for financial service providers, regulators and central banks. The author offers a comprehensive overview of these opportunities and their countervailing legal and regulatory challenges. The author describes and analyses in unprecedented detail the application of digital financial innovation FinTech and some of its core manifestations including virtual currencies, Blockchain and distributed ledger technologies to the delivery of financial services in areas such as payments, securities clearing and settlement, central banking, real time access to financial information, instant completion of core financial transactions, data validation and reconciliation processes and digital contracting smart contracts. Also clarified are the legal and other barriers to be overcome including cybersecurity and risks to privacy before any widespread adoption of digital innovation in the highly regulated financial sector context can occur. As an informed assessment of the legal merits and risks of technological innovation for financial service providers and central banks and as a contribution to establishing a conceptual framework within which to analyse and better understand the applications of digital innovation to the financial sector this practical work is bound to be welcomed by legal practitioners and legal scholars alike with an interest in financial services. Policymakers and regulators will also appreciate its guidance on how to temper the less benevolent aspects of FinTech with targeted risk focused regulation so as to promote innovation and preserve the potential benefits for financial markets and their participants alike.

Chokepoints Natasha Tusikov, 2016-11-22 In January 2012 millions participated in the now infamous Internet blackout against the Stop Online Piracy Act protesting the power it would have given intellectual property holders over the Internet. However while SOPA's withdrawal was heralded as a victory for an open Internet a small group of corporations tacitly backed by the US and other governments have implemented much of SOPA via a series of secret handshake agreements. Drawing on extensive interviews Natasha Tusikov details the emergence of a global regime in which large Internet firms act
