It creates a ludological retelling of the 21st century through 100 games that were announced and played from the turn of the century. The book analyzes them and then uses the games as a means of entry to examine both key events in the 21st century and the evolution of the gaming industry. Adopting a tri-pronged perspective, the reviewer, the academic, and an industry observer, it studies games as ludonarratological artefacts and re-situates games in a societal context by examining how they affect and are engaged with by players, reviewers, the gaming community, and the larger gaming industry. This book will be a must-read for readers interested in video games, new media, digital culture, and culture studies and history.    *Management Information Systems* James A. O'Brien, George M. Marakas, 2008 The benchmark text for the syllabus organized by technology: a week on databases, a week on networks, a week on systems development, etc. Taught from a managerial perspective, O'Brien defines technology and then explains how companies use the technology to improve performance. Real-world cases finalize the explanation.
